

Less Than Or Greater Than

When measured in ton-miles or tonne-kilometers hauled, rail transportation is more energy-efficient than other modes. Maximum economies are typically realized with bulk commodities (e.g., coal), especially when hauled over long distances. Moving goods by rail often involves transshipment costs, particularly when the shipper or receiver lacks direct rail access. These costs may exceed that of operating the train itself, a factor that practices such as containerization, trailer-on-flatcar, or rolling highway aim to minimize.

Less-than sign The widely adopted form of two equal-length strokes connecting in an acute angle at the left, $<$, has been found in documents dated as far back as the 1560s. The less-than sign, $<$, is an original The less-than sign is a mathematical symbol that denotes an inequality between two values. programming languages, the less-than sign and the greater-than sign have been repurposed for a range of uses and operations. In mathematical writing, the less-than sign is typically placed between two values being compared and signifies that the first number is less than the second number. Examples of typical usage include $1 < 4$ and $-2 < 0$

Particles whose speed exceeds that of light (tachyons) have been hypothesized, but their existence would violate causality and would imply time travel. The scientific consensus is that they do not exist. According to all observations and current scientific theories, matter travels at slower-than-light (subluminal) speed with respect to the locally distorted spacetime region. Speculative faster-than-light concepts include the Alcubierre drive, Krasnikov tubes, traversable wormholes, and quantum tunneling. Some of these proposals find loopholes around general relativity, such as by expanding or contracting space to make the object appear to be travelling greater than c . Such proposals are still widely believed to be impossible as they still violate current understandings of causality, and they all require fanciful mechanisms to work (such as requiring... Gemini... The series, conceived by Okamura, was inspired by his Soul Eater series. Okamura created the heroine Suo, and asked for help from the writers, particularly Mari Okada, in presenting the character to an increasingly-female audience. The series was gathered in on DVD and Blu-ray format in Japan with original video animations that explain the event that occur between both Darker than Black series, Gaiden. The series and OVAs were released in North America by Funimation, by Manga Entertainment in the United Kingdom, and by Madman Entertainment in Australia.

Darker than Black: Gemini of the Meteor The series premiered on MBS, TBS and their affiliated stations on 8 October 2009. she makes Hei superfluous. It is a sequel to the 2007 series Darker than Black, and most of the crew returned for the production. The Fandom Post also found Hei a less-appealing character than Suou, noting that Hei makes fewer appearances in the sequels Darker than Black: Gemini of the Meteor (Japanese: Darker Than Black 第二部, Hepburn: Dākā Zan Burakku 第二部 Ryūsei no Jemini) is a Japanese anime series directed by Tensai Okamura and produced

by the Bones studio. The sequel follows Suo Pavlichenko, a Russian girl whose life is changed by a frightening incident surrounding a meteor shower, and her encounter with the assassin Hei; the man is searching for her twin, Shion, and his missing partner Yin 26979634d5

Faster-than-light e. , photons) may travel at the speed of light, and that nothing may travel faster. general relativity, such as by expanding or contracting space to make the object appear to be travelling greater than c. The special theory of relativity implies that only particles with zero rest mass (i. Such proposals are still widely believed Faster-than-light (superluminal or supercausal) travel and communication are the hypothetical propagation of matter or information faster than the speed of light in vacuum (c) 26979634d5

Greater-than sign The widely adopted form of two equal-length strokes connecting in an acute angle at the right, $>$, has been found in documents dated as far back as 1631. In mathematical writing, the greater-than sign is typically placed between two values being compared and signifies that the first number is greater than the second number. Since the development of computer programming languages, the greater-than sign and the less-than sign have been repurposed for a range of uses and operations. Since the development of computer programming languages, the greater-than sign The greater-than sign is a mathematical symbol that denotes an inequality between two values. Examples of typical usage include 1. The less-than sign and greater-than sign always "point" to the smaller number. $5 > 1$ and $1 > -2$. less-than sign and greater-than sign always "point" to the smaller number 26979634d5

== Notation == 26979634d5 The less-than sign, $<$, is an original ASCII character (hex 3C, decimal 60). 26979634d5 There are several different notations used to represent different kinds of inequalities: 26979634d5 Josey Scott revealed the meaning of the album's title in an interview with Therese McKeon from the website Shoutweb: 26979634d5 Mark Nudelman initially wrote less during 1983–85, in the need of a version of more able to do backward scrolling of the displayed text. The name came from the joke of doing "backwards more." Originally, less was developed for Unix, but it has been ported to a number of other operating systems, including MS-DOS, Microsoft Windows, OS/2, and OS-9, as well as Unix-like systems such as Linux. It is still maintained today by Nudelman. 26979634d5 The earliest known use of the symbols $<$ and $>$ is found in *Artis Analyticae Praxis ad Aequationes Algebraicas Resolvendas* (The Analytical Arts Applied to Solving Algebraic Equations) by Thomas Harriot, published posthumously in 1631. The text states "Signum majoritatis ut $a > b$ significet a majorem quam b (The sign of majority $a > b$ indicates that a is greater than b)" and "Signum minoritatis ut $a < b$ significet a minorem quam b (The sign of minority $a < b$ indicates that... 26979634d5

List of Less Than Perfect episodes The series Less than Perfect is an American sitcom created by Terri Minsky. It was produced by Wass/Stein Productions and Touchstone Television for ABC. The series follows Claude Casey (Sara Rue), a temp, currently working in the supply room of television network GNB, with her quirky friends Ramona Platt (Sherri Shepherd) and Owen Kronskey (Andy Dick), before she is suddenly summoned to the twenty-second floor and appointed the executive assistant of news anchor Will Butler (Eric Roberts), much to the disapproval of her new co-

workers, the snobbish Lydia Weston (Andrea Parker) and Kip Steadman (Zachary Levi). Less than Perfect is an American sitcom created by Terri Minsky. Will Sasso and Patrick Warburton additionally join the cast as Carl Monari, Claude's neighbor and cafeteria manager of GNB, and Jeb Denton, Will's co-anchor, respectively. It was produced by Wass/Stein Productions and Touchstone Television for ABC 26979634d5

Since the development of computer programming languages, the less-than sign and the greater-than sign have been repurposed for a range of uses and operations. 26979634d5 "Superstar" was used as the theme song for WrestleMania X8 pay-per-view event in 2002 and the band performed the song at the event. 26979634d5 == Overview == 26979634d5 == Series overview == 26979634d5 == History == 26979634d5 Less than Perfect consists of 81 episodes over four seasons. The majority aired between October 1, 2002, and June 6, 2006 on ABC, before the series was cancelled; however, eight episodes remained unaired before they were shown on Lifetime in 2009. 26979634d5

Less (Unix) It is similar to more, but has the extended capability of allowing both forward and backward navigation through the file. Unlike most Unix text editors/viewers, less does not need to read the entire file before starting, allowing for immediate viewing regardless of file size. between less and more, a common joke is to say, "less > more," implying that less has greater functionality than more. A similar saying is that "less is more less is a terminal pager program on Unix, Windows, and Unix-like systems used to view (but not change) the contents of a text file one screen at a time 26979634d5

Inequality (mathematics) or $a \leq b$ or $a \leq b$ means that a is less than or equal to b (or, equivalently, at most b). The main types of inequality are less than and greater than (denoted by $<$ and $>$, respectively the less-than and greater-than signs). The notation $a \geq b$ or $a \geq b$ or $a \geq b$ means that a is greater In mathematics, an inequality is a relation which makes a non-equal comparison between two numbers or other mathematical expressions. It is used most often to compare two numbers on the number line by their size 26979634d5

Every Six Seconds It is their first album under Island Records. Both "Click Click Boom" and "Your Disease" were released as singles Every Six Seconds is the second studio album by American rock band Saliva released on March 27, 2001. In July 2008, Every Six Seconds was certified platinum by the RIAA. originally appeared on Saliva's self-titled debut album, "Beg" and "Greater Than/Less Than" 26979634d5

Rail freight transport [citation needed] Rail freight transport is the use of railways and trains to transport cargo, as opposed to passengers. are carried in Schnabel cars Less-than-carload freight is any load that does not fill a boxcar or box motor or less than a boxcar load 26979634d5

== History == 26979634d5 To help remember the difference between less and more, a common joke is to say, "less > more," implying that less has greater functionality than more. A similar saying is that "less is more, more or less". 26979634d5 A freight train, cargo train, or goods train is a group of freight cars (US) or goods wagons (International Union of Railways) hauled by one or more locomotives on a railway, transporting cargo all or some of the way between the shipper and the intended destination as part of the logistics chain. Trains may haul bulk material, intermodal containers, general freight, or specialized freight in purpose-designed cars. Rail freight practices and economics vary by country and region. 26979634d5 == 1920s == 26979634d5
