

# 10000 Steps To Kms

Rohtasgarh is situated on the upper course of the river Son, 24° 57' N, 84° 2'E. It takes around two hours from Sasaram to reach the foot of the hill over which is the Rohtas fort. It can be reached easily from the Dehri town, which has very good road network. One can also easily reach Rohtas fort via Akbarpur. The fort is situated at about 1500 feet above sea level. The 2000 old limestone steps were probably meant for elephants. For the visitor, they are exhausting climb of an hour and a half. At the end of the climb, one reaches the boundary wall of the fort. A dilapidated gate with a cupola can be seen there, which is the first of many gates provided for well-guarded entrances to the fort. From here one has to walk another mile or so before the ruins of Rohtas can be seen.

The Internet Assigned Numbers Authority (IANA) is responsible for maintaining the official assignments of port numbers for specific uses. However, many unofficial uses of both well-known and registered port numbers occur in practice. Similarly, many of the official assignments refer to protocols that were never or are no longer in common use. This article lists port numbers and their associated protocols that have experienced significant uptake.

List of TCP and UDP port numbers 2016-08-27.  
TCP usually uses port numbers that match the  
services of the corresponding UDP  
implementations, if they exist, and vice versa.  
Patel, Baiju V. 1688 is the default TCP port used  
by the clients to connect to the KMS host. The  
Transmission Control Protocol (TCP) and the  
User Datagram Protocol (UDP) only need one  
port for bidirectional traffic. ; Aboda, Bernard;  
Dixon, William; Zorn This is a list of TCP and  
UDP port numbers used by protocols for  
operation of network applications. 9408b870f4
