

Another Word For Facilitate

Icebreakers should be relaxing and non-threatening. For example, icebreakers in a professional setting should not require people to reveal personal information... 1614432f83 Common word processor programs include LibreOffice Writer, Google Docs, and Microsoft Word. 1614432f83 The NATO communications manual ACP-125 contains the most formal and perhaps earliest modern (post-World War II) glossary of proverbs, but its definitions have been adopted by many other organizations, including the United Nations Development Programme, the U.S. Coast Guard, US Civil Air Patrol, US Military Auxiliary Radio System, and others. 1614432f83 == Background == 1614432f83 Norman Triplett's early investigations describe social facilitation to occur during instances of coaction, which is performing a task in the presence of other people performing a similar task, while not necessarily engaging in direct interactions with each other. Triplett first observed this in cyclists, finding that cyclists rode at faster speeds when competing against other cyclists compared to when cycling alone. Social facilitation has also been known to occur when performing a task in front of an audience, or during periods of observation, sometimes referred to as audience effects. For instance, during exercise Meumann (1904) found that when being watched, individuals could lift heavier weights compared to when they were not being watched. Research on the effects of coaction and audience effects on social facilitation... 1614432f83

WordStar WordStar is a discontinued word processor application for microcomputers. Rob Barnaby was the sole author of the early versions of the program. It was published by MicroPro International and originally written for the CP/M-80 WordStar is a discontinued word processor application for microcomputers. It was published by MicroPro International and originally written for the CP/M-80 operating system (OS), with later editions added for MS-DOS and other 16-bit PC OSes 1614432f83

An icebreaker should be related to the subject or the purpose of the meeting. For example, if a collaborative learning environment is needed for a training project, then an icebreaker exercise that promotes collaboration could be chosen. If the subject of the meeting is literature, then the subject of the meeting could be introduced through an exercise that revolves around a participant's favourite books. Most icebreakers should promote an appropriate level of self-disclosure, as this builds trust between participants in the group and helps develop group cohesiveness. 1614432f83

Icebreaker (facilitation) The participants try to form groups An icebreaker is a brief facilitation exercise intended to help members of a group begin the process of working together or forming a team. to walk around the room in one direction, saying the word 'mingle' over and over. The facilitator then shouts a number. They are commonly presented as games to "warm up" a group by helping members get to know each other and often focus on sharing personal information such as names or hobbies 1614432f83

Word processor (electronic device) The word processor A word processor is an electronic device (later a computer software application) for text, composing, editing, formatting, and printing. A word processor is an electronic device (later a computer software application) for text, composing, editing, formatting, and printing 1614432f83

== Purpose == 1614432f83 There is widespread agreement within the scientific community and among disability advocacy organizations that FC is a pseudoscience. Research indicates that the facilitator is the source of the messages obtained through FC, rather than the disabled person. The facilitator may believe they are not the source of the messages due to the ideomotor effect, which is the same effect that guides a Ouija board and dowsing rods. Studies have consistently found that FC is unable to provide the correct response to even simple questions when the facilitator does not know the answers to the questions (e.g., showing the patient but not the facilitator an object). In addition, in numerous cases disabled persons have been assumed by facilitators to be typing a coherent message while the patient's eyes were closed or while they... 1614432f83

AbiWord AbiWord comes with several import and export filters providing partial support for such formats AbiWord () is a free and open-source word processor. The name "AbiWord" is derived from the root of the Spanish word "abierto", meaning "open". service that facilitated collaboration between users. It is written in C++ and since version 3 it is based on GTK+ 3 1614432f83

Facilitated communication The technique involves a facilitator guiding the disabled person's arm or hand in an attempt to help them type on a keyboard or other such device that they are unable to properly use if unfacilitated. Facilitated communication (FC), or supported typing, is a scientifically discredited technique that claims to allow non-verbal people, such as those with Facilitated communication (FC), or supported typing, is a scientifically discredited technique that claims to allow non-verbal people, such as those with autism, to communicate 1614432f83

The functions of a word processor program are typically between those of a simple text editor and a desktop publishing program. Many word processing programs have gained advanced features over time providing similar functionality to desktop publishing programs. 1614432f83 AbiWord is part of the AbiSource project which develops a number of office-related technologies. 1614432f83

Social facilitation doing the task alone. That is, people do better on tasks when they are with other people rather than when they are doing the task alone. Situations that elicit social facilitation include coaction and performing for an audience, and appears to depend on task complexity Social facilitation is a social phenomenon in which being in the presence of others improves individual task performance. Situations that elicit social facilitation include coaction and performing for an audience, and appears to depend on task complexity 1614432f83

The macOS port has remained on version 2.4 since 2005, although the current version does run non-natively on macOS through XQuartz. 1614432f83

Word processor A word processor (WP) is a device or computer program that provides for input, editing, formatting, and output of text, often with some additional features A word processor (WP) is a device or computer program that provides for input, editing, formatting, and output of text, often with some additional features 1614432f83

Starting with WordStar 4.0, the program was built on new code written principally by Peter Mierau. WordStar dominated the market in the early and mid-1980s, succeeding the previous market leader, Electric Pencil. 1614432f83

Procedure word (prowords) are words or phrases limited to radiotelephony procedure used to facilitate communication by conveying information in a condensed standard verbal format. Procedure words (abbreviated to prowords) are words or phrases limited to radiotelephony procedure used to facilitate communication by conveying information in a condensed standard verbal format. Prowords are voice versions of the much older procedural signs for Morse code which were first developed in the 1860s for Morse telegraphy, and their meaning is identical. 1614432f83

As the more versatile combination of personal computers and printers became commonplace, and computer software applications for word processing became popular, most business machine companies stopped manufacturing dedicated word processor machines. In 2009 there were only two U.S. companies, Classic and AlphaSmart, which still made them. Many older machines, however, remain in use. Since 2009, Sentinel... 1614432f83 AbiWord was originally started by SourceGear Corporation as the first part of a proposed AbiSuite but was adopted by open source developers after SourceGear changed its business focus and ceased development. It now runs on Linux, ReactOS, Solaris, AmigaOS 4.0 (through its Cygwin X11 engine), MeeGo (on the Nokia N9 smartphone), Maemo (on the Nokia N810), QNX and other operating systems. Development of a version for Microsoft Windows ended due to lack of maintainers (the latest released versions are 2.8.6 and 2.9.4 beta). 1614432f83

Screenwriting software While add-ins and macros for word processors, such. software are word processor programs specialized to the task of screenwriting and writing screenplays. 1614432f83

== Examples == 1614432f83 WordStar was written with as few assumptions as possible about the operating system and machine hardware, allowing it to be easily ported across the many platforms that proliferated in the early 1980s. Because all of these versions had relatively similar commands and controls, users could move between platforms with equal ease. It was already popular when its inclusion with the Osborne 1 portable computer made the program the de facto standard for much of the small computer word-processing market. 1614432f83 The term word processing appeared in American... 1614432f83 Although they have become popular over the years, there is a good number of people who dislike them, with some feeling they are a waste of time. 1614432f83 Prowords are one of several structured parts of radio voice procedures, including brevity codes and plain language radio checks. 1614432f83 == Features == 1614432f83 The word processor was a stand-alone office machine developed in the 1960s, combining the keyboard text-entry and printing functions of an electric typewriter with a recording unit, either tape or floppy disk (as used by the Wang machine) with a simple dedicated computer processor for the editing of text. Although features and designs varied among manufacturers and models, and new features were added as technology advanced, the first word processors typically featured a monochrome display and the ability to save documents on memory cards or diskettes. Later models introduced innovations such as spell-checking programs, and improved formatting options. 1614432f83 As the market became dominated by the IBM PC and later Microsoft Windows, this same portable design made it difficult for the program to add new features, and affected its performance... 1614432f83 According to the U.S. Marine Corps training document FMSO 108, "understanding the following PROWORDS and their respective definitions is the key to clear and concise communication procedures". 1614432f83 AbiWord supports both basic word processing features such as lists, indents and character formats, and more sophisticated features including tables, styles, page headers and footers, footnotes, templates, multiple views, page... 1614432f83 Word processors developed from mechanical machines, later merging with computer technology. The history of word processing is the story of the gradual automation of the physical aspects of writing and editing, and then to the refinement of the technology to make it available to corporations and individuals. 1614432f83

Portmanteau In a partial blend, one entire word is concatenated with a splinter from another. Some linguists. "portmanteaus" for which this meaning of the word was created. 1614432f83

Early word processors were stand-alone devices dedicated to the function, but current word processors are primarily word processor programs running on general purpose computers, including smartphones, tablets, laptops, and desktop computers, with dedicated hardware word processors being confined to a small niche market. 1614432f83
