Fat people marry less often, experience fewer educational and career opportunities, and on average earn a lesser income than normal weight individuals. Although public support regarding disability services, civil rights, and anti-workplace discrimination laws for obese individuals have gained support across the years, overweight and obese individuals still experience discrimination, which may have detrimental implications in relation to both physiological and psychological health.

Fat feminism Contemporary western fat feminism works to dismantle oppressive power structures which disproportionately affect fat, queer, non-white, disabled, and other non-hegemonic bodies. Fat feminists advocate body-positive acceptance for all bodies, regardless of their weight, as well as eliminating biases experienced directly or indirectly by fat people. Their boss even held mandatory weigh-ins and prohibited them from gaining above 7% of their total body weight. This branch of feminism intersects misogyny and sexism with anti-fat bias. It covers a wide range of topics such as diet culture, fat-phobia, representation in media, ableism, and employment discrimination. A significant portion of body positivity in the third-wave focused on embracing and reclaiming femininity, such as wearing makeup and high heels, even though the second-wave fought against these things. Fat feminism originated during third-wave feminism and is aligned with the fat acceptance movement. Shortly after Fat feminism, often associated with "body-positivity", is a social movement that incorporates feminist themes of equality, social justice, and cultural analysis based on the weight of a woman or a non-binary feminine person. the women take laxatives b2642f35a0

Carpenter was born in New Haven, Connecticut, and moved to Downey, California, in 1963 with her family. She began to study the drums in high school and joined the Long Beach State choir in college. After several years touring and recording, the Carpenters were signed to A&M Records in 1969, when Karen was 19 years old. They achieved enormous commercial and critical success throughout the 1970s. Initially, Carpenter was the band's full-time drummer, but she gradually took the role of frontwoman as her drumming was reduced to a handful of live showcases or tracks on albums. b2642f35a0 Individuals with anorexia nervosa have a fear of gaining weight, despite the fact that they are typically underweight. The DSM-5 describes this perceptual symptom as "disturbance in the way in which one's body weight or shape is experienced". Recent research has shown that this disturbance is based not on visual body-size overestimation but rather on body dissatisfaction: individuals with anorexia can accurately visually identify their body size, but find severely underweight bodies the most attractive. Individuals with anorexia nervosa may also deny that their symptoms or behaviors are indicative of illness. They may weigh themselves frequently, eat small amounts, and only eat certain foods in order to be in as much control of their body appearance as possible. Some patients with anorexia

obesity medication or weight loss medications are pharmacological agents that reduce excess body fat and cause weight loss. These medications alter one of the fundamental processes of weight regulation, by: reducing appetite and consequently energy intake, increasing energy expenditure, redirecting nutrients from adipose to lean tissue, or interfering with the absorption of calories. at producing weight loss are those of Soranus of Ephesus, a Greek physician, in the second century AD b2642f35a0

Eating behaviors, such as inducing vomiting, excessive physical activity, and using laxatives as compensatory measures. In biology, this is typically done to provide heterotrophic organisms with the essential nutrients and energy needed for metabolism and physical growth, since they are incapable of acquiring nutrition and energy intrinsically like autotrophs and therefore must ingest external organic matters in order to survive. If eating and drinking is not possible, as is Eating (also known as feeding or consuming) is the ingestion of food for digestion. based sources. Cats on lower protein diets are more likely to lose weight, and to lose lean body mass. By the late 19th century, commercial cat food emerged, with companies like Spratt's offering ready-made products to replace boiled horse meat. The idea of specialized cat food developed later than dog food, as cats were long considered to be self-sufficient hunters. In the 19th and early 20th centuries, cats in London were commonly fed horse meat sold by itinerant traders known as Cats' Meat Men or Women, who traveled fixed routes to serve households b2642f35a0
