Torrealba D (14 March 2020). 13 March 2020. primeros casos de coronavirus" cf153131ca

== Statistics by country and territory == cf153131ca Transparency International cited El Salvador and Colombia as examples of an "explosion of irregularities and corruption cases" related to the handling of the pandemic in Latin America. The Ministry of Health and Ministry of Treasury, along with other 18 government institutions are currently under investigation by the Attorney General's Office. cf153131ca The case fatality ratio... cf153131ca The cases were concentrated in the Santiago metropolitan area, with outbreaks in other regions in the country. No national lockdown was established in Chile, unlike in neighboring Argentina and Peru, although a night curfew was implemented throughout the country. Quarantines were established locally in different cities and neighborhoods. However, in May 2020 the whole city of Santiago was put under mandatory quarantine due to an increase of cases, and similar situations were extended to most of the largest cities in Chile. cf153131ca

COVID-19 pandemic in El Salvador elmundo. As of 19 September 2021, El Salvador reported 102,024 cases, 3,114 deaths, and 84,981 recoveries. Retrieved 21 March 2020. Prensa Grafica. As of that date El Salvador had arrested a total of 2,424 people for violating quarantine orders, and 1,268,090 people had been tested for the virus. 20 March 2020. Health The COVID-19 pandemic in El Salvador was a part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The virus was confirmed to have reached El Salvador on 18 March 2020. cr. "El Salvador confirma 2 nuevos casos de COVID-19",. Retrieved 19 March 2020. On 31 March 2020, the first COVID-19 death in El Salvador was confirmed cf153131ca

As of 9 August 2022, Costa Rica has reported 1,057,695 positive cases, and 8,774 deaths. cf153131ca == January 2020 == cf153131ca

COVID-19 pandemic in Costa Rica "19 casos nuevos The COVID-19 pandemic in Costa Rica was a part of the ongoing worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). El Mundo CR (in Spanish). casos de coronavirus en Costa Rica",. Archived from the original on 10 April 2020. The virus was confirmed to have spread to Costa Rica on 6 March 2020, after a 49-year-old woman tourist from New York, United States, tested positive for the virus. Retrieved 15 April 2020 cf153131ca

On 12 January 2020, the World Health Organization (WHO) confirmed that a novel coronavirus was the cause of a respiratory illness in a cluster of people in Wuhan City, Hubei Province, China, which was reported to the WHO on 31 December 2019. cf153131ca As of 15 December 2023, the United States has had the highest number of cases in North America, at over 103 million cases, as well as the highest death toll, at over a million deaths. There have been nearly 75.7 million recoveries in the United States as of 15 December 2023, meaning that nearly 12 out of 13 cases in the country have recovered or that the recovery... cf153131ca Considering its population, by June 2020 Chile had one of the worst outbreaks in the world. Initially, the number of fatalities reported was lower than in other countries in South America... cf153131ca

COVID-19 pandemic in Chile Initial cases had been imported from Southeast Asia and Europe, and expanded into a large number of untraceable infections, placing the country within phase 4 of the pandemic as defined by the World Health Organization, with over 1,000 confirmed cases by 25 March 2020. Retrieved 12 March 2020. cnnchile (in European Spanish) The worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) severely affected Chile. September 2020. "10 nuevos casos: Minsal reporta que hay 33 infectados de Covid-19 en Chile",. The virus was confirmed to have reached Chile on 3 March 2020 cf153131ca

As of 31 March 2022, there have been 10,166,273 vaccine doses applied. Among these, 4,336,171 are first dosages, 3,971,404 are second dosages, and 1,858,698 are third doses . cf153131ca On 12 January 2020, the World Health Organization (WHO) confirmed that a novel coronavirus was the cause of a respiratory illness in a cluster of people in Wuhan City, Hubei Province, China, which was reported to the WHO on 31 December 2019. cf153131ca == Background == cf153131ca

COVID-19 pandemic in Ecuador Ministerio de Salud confirma dos nuevos casos de #covid19 en #Ecuador; en total 17 personas están infectadas. The virus was reported to have spread to Ecuador on 29 February 2020, when a woman in her 70s tested positive for the virus. Uno de los casos 'tuvo contacto directo con el The COVID-19 pandemic in Ecuador was a part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Ecuador was described in April as emerging as a possible "epicentre" of the pandemic in Latin America, with the city of Guayaquil overwhelmed to the point where bodies were being left in the street cf153131ca

On 3 March 2020, the virus was confirmed to have spread to Argentina. On 7 March 2020, the Ministry of Health confirmed the country's first documented death, a 64-year-old man who had travelled to Paris, France, who also had other health conditions; the case was only confirmed as positive after the patient's demise. cf153131ca Puerto Rico started addressing the risks of an outbreak in early 2020. The island took "some of the most dramatic steps of any U.S. jurisdiction to control the virus," and "several U.S. cities and states followed Puerto Rico's lead, imposing curfews and shutting businesses" of their own. On February 29, Puerto Rico then governor Wanda Vázquez Garced established a task force to look into how the virus could affect Puerto Rico and to lay out plans on how to best mitigate any outbreaks. Given the long delays encountered by the Puerto Rico government in obtaining reasonable turnaround from the CDC test labs in Atlanta for samples submitted for testing, the local government took the position that every suspicious case was to be treated as a COVID-19 case until test results were received, and ordered patients to be kept in isolation for 14 days. On March 12, one day before the first COVID-19 case was confirmed, the governor declared a state of... cf153131ca
