A boa can be made of fur, but it is usually made instead from various types of feathers. Ostrich, marabou stork, and turkey are the most common feathers used, although non-feather boas are also available. The feathers go through bleaching or dyeing processes and are glued and stitched into lengths called "ply". Sometimes more natural boas are produced. A lightweight chandelle boa might only weigh 65 grams (2.3 oz), whereas a 24 ply ostrich boa can weigh as much as 200 grams (7.1 oz). The more ply, the fluffier and thicker the boa. Boas are generally measured by weight (grams), length (centimetres), and ply. Boas are available through novelty, costume, or lingerie shops, as well as online. 4c81dbdf67 A hypothetical alcoholic beverage sized to one standard drink varies in volume depending on the alcohol concentration of the beverage (for example, a standard drink of spirits takes up much less space than a standard drink of beer), but it always contains the same amount of alcohol and therefore produces the same amount of intoxication. Many government health guidelines specify low to high risk amounts in units of grams of pure alcohol per day, week, or single occasion. These government guidelines often illustrate these amounts as standard drinks of various beverages, with their serving sizes indicated. Although used for the same purpose, the definition of a standard drink varies very widely from country to country. 4c81dbdf67
