

Rowing On A Machine

Indoor rower Modern indoor An indoor rower, or rowing machine, is a machine used to simulate the action of watercraft rowing for the purpose of exercise or training for rowing. rower, or rowing machine, is a machine used to simulate the action of watercraft rowing for the purpose of exercise or training for rowing. The term "indoor rower" also refers to a participant in this sport. Modern indoor rowers are known as ergometers (colloquially erg or ergo) because they measure work performed by the rower (that can be measured in ergs). Indoor rowing has become established as a sport, drawing a competitive environment from around the world 016ff1c05e

Early rowing machines are known to have existed from the mid-1800s, a US patent being issued to W.B. Curtis in 1872 for a particular hydraulic-based damper design. Machines using linear pneumatic resistance were common around 1900. One of the most popular was the Narragansett hydraulic rower, manufactured in Rhode Island from around 1900–1960. 016ff1c05e
