There are several separate reasons why animals have evolved colours. Camouflage enables an animal to remain hidden from view. Animals use colour to advertise services such as cleaning to animals of other species; to signal their sexual status to other members of the same species; and in mimicry, taking advantage of the warning coloration of another species. Some animals use flashes of colour to divert attacks by startling predators. Zebras may possibly use motion dazzle, confusing a predator's attack by moving a bold pattern rapidly. Some animals are coloured for physical protection, with pigments

in the skin to protect against sunburn, while some frogs can lighten or darken their skin for temperature regulation. Finally, animals can be coloured incidentally. For example, blood is red because the haem pigment needed to carry oxygen is red. Animals coloured... 64439dbe10

The book includes Anugita parva, over 36 chapters, which Krishna describes as mini Bhagavad Gita. The chapters are recited because Arjuna tells Krishna that he is unable to recollect the wisdom of Bhagavad Gita in the time of peace, and would like to listen to Krishna's wisdom again. Krishna recites Anugita (lit. 'Subsequent Gita') as a dialogue between a Brahmin's wife and Brahma.

Scholars have suggested Anugita to be a spurious addition to Ashvamedhika Parva in medieval times, and a corruption of the original Mahabharata.
