pressure. The unit was called centigrade in several languages (from the Latin *centum*, which means 100, and *gradus*, which means steps) for many years. (In Celsius's initial proposal, the values were reversed: the boiling point was 0 degrees and the freezing point was 100 degrees. Most countries use this scale, with the exception of the United States, some island territories, and Liberia, where the Fahrenheit scale is still used. In 1948, the International Committee for Weights and Measures

renamed it to honor Celsius and also to remove confusion with the term for one hundredth of a gradian in some languages.)
