

Salter Harris Type 2

Lake Harris was named by the Government of South Australia after the surveyor, Charles Hope Harris, who discovered and mapped it in 1874. Although the national scenic area designation provides a degree of additional protection via the planning process, there are no bodies equivalent to a national... == Background == Missouri does not have a red flag law which permits a state court to order the temporary removal of firearms from a person who they believe may present a danger to others or themselves. Central Visual and Performing Arts High School uses the code word "Miles Davis is in the building" to alert students and staff of an active shooter in the building. The school also has several metal detectors, and seven security guards were present on the day of the shooting.

Salter-Harris fracture Salter and William H. September 13, 2011. Harris who created and published this classification system in the Journal of Bone and Joint Surgery in 1963. Wheelsonline. "Salter Harris Type III Frx - Wheelsonline; Textbook of Orthopaedics". "Salter Harris: A Salter-Harris fracture is a fracture that involves the epiphyseal plate (growth plate) of a bone, specifically the zone of provisional calcification. It is thus a form of child bone fracture. It is a common injury found in children, occurring in 15% of childhood long bone fractures. com. This type of fracture and its classification system is named for Robert B. Retrieved August 27, 2013

After completing school at St Peter's College in Adelaide, South Australia, Harris completed a Bachelor of Medicine and Bachelor of Surgery at Flinders University in 1988. He subsequently completed anaesthetics training in the United Kingdom and New Zealand as well as aeromedical retrieval certification at James Cook University.

South Lewis, Harris and North Uist National Scenic Area South Lewis, Harris and North Uist is a large national scenic area (NSA) in the Western Isles of Scotland. It is one of 40 such areas in Scotland, which South Lewis, Harris and North Uist is a large national scenic area (NSA) in the Western Isles of Scotland. It is one of 40 such areas in Scotland, which are defined so as to identify areas of exceptional scenery and to ensure its protection from inappropriate development. The designated area covers 202,388 ha in total, of which 112,301 ha is on land, with a further 90,087 ha being marine (i. below low tide level), making it the largest of the NSAs in both total and marine area. e. The designated area includes the mountainous south west of Lewis, all of Harris, the Sound of Harris and the northern part of North Uist

Almon Harris Thompson H. Almon Harris Thompson (September 24, 1839 – July 31, 1906), also known as A. Thompson, was an American topographer, geologist, explorer, educator and

Lake Harris is aligned in a north-easterly direction with an overall length of about 32 kilometres (20 mi) and a maximum width of about 16 kilometres (10 mi). It extent includes “a number of Islands” described as being formed from “Quaternary deposits with extensive sand cover”. Its bed consists of “gypsiferous muds, clays and silts with some gypsum crystals” topped with a salt crust of thickness in the range of 30 millimetres (1.2 in) to 75 millimetres (3.0 in), although parts of the lake have a surface with “no identifiable salt crust”. The lake bed contains a dune field of gypsum sands which vegetated with both “low samphire shrubland and tall shrubland with a chenopod shrub understorey”.

Tillaux fracture It occurs in older adolescents A Tillaux fracture is a Salter-Harris type III fracture through the anterolateral aspect of the distal tibial epiphysis. It occurs in older adolescents between the ages of 12 and 15 when the medial epiphysis had closed but before the lateral side has done so, due to an avulsion of the anterior inferior tibiofibular ligament, at the opposite end to a Wagstaffe-Le Fort avulsion fracture. A Tillaux fracture is a Salter-Harris type III fracture through the anterolateral aspect of the distal tibial epiphysis

Lake Harris (South Australia) Lake Harris is an endorheic salt lake in the Australian state of South Australia to the north of the Eyre Peninsula located about 530 kilometres (330 mi) Lake Harris is an endorheic salt lake in the Australian state of South Australia to the north of the Eyre Peninsula located about 530 kilometres (330 mi) northwest of the state capital of Adelaide within the gazetted localities of Lake Harris and Wilgena

== Education and medical career ==

Harris Martin Harris Martin (April 2, 1865 – April 26, 1903) was an American boxer known as "The Black Pearl". He declared himself the first colored middleweight champion

== Types == Lake Harris along with the nearby lakes of Everard and Gairdner, form the extent of the protected area... National scenic areas are primarily designated due to the scenic qualities of an area, however NSAs may well have other special qualities, for example related to culture, history, archaeology, geology or wildlife. Areas with such qualities may be protected via other national and international designations that overlap with the NSA designation. There are several Natura 2000 sites within the designated area of the NSA.

Richard Harris (anaesthetist) He has dived to 284m (932 ft) and is the first person known to have breathed hydrogen as a diluent gas on a rebreather. Harris is best known for having played a crucial role in the Tham Luang cave rescue in Thailand in 2018. Harris was awarded 2019 Australian of the Year along with his dive partner Craig Challen. Richard James Dunbar "Harry" Harris SC, OAM, PBh (GCT) (born 1964) is an Australian cave diver and retired anaesthetist who has served as the lieutenant Richard James Dunbar "Harry" Harris , PBh (GCT) (born 1964) is an Australian cave diver and retired anaesthetist who has served as the lieutenant governor of South Australia since 2024
