Juventeny first participated in the Dakar Rally in 1991. Juventeny and Criado have 16 victories in the 6x6 category and 4 victories in Production (series trucks). In 2023, they participated with a truck partially powered by hydrogen, becoming the first hydrogen-powered truck to finish the Dakar Rally. Education and early research Lario was born in Madrid, Spain. He has a Master of Research in Economics from the London Business School, a Master of Finance from Princeton University, and a PhD in Financial Economics from the Complutense University of Madrid. As of 2024, low-emission hydrogen, including both blue and green hydrogen, accounted for less than 1% of global hydrogen production, with green hydrogen only making up around 12% of all low-emission hydrogen production. Green hydrogen is more costly to produce compared to all other methods of hydrogen production... Juventeny has 34 participations in the Dakar Rally, and from 1995 to 2021, he participated with the Andalusian José Luis Criado as co-pilot (resuming the partnership in 2023), who with 33 participations is the Spaniard with the most presences in the Dakar Rally, surpassing in one participation to Xavi Foj and Juventeny himself, and two participations to Rafa Tibau Sr. He won the 2024, 2025 and 2026 editions of the Dakar Rally in the Mission 1000 category. Green hydrogen's principal purpose is to help limit global warming, reduce fossil fuel dependence by replacing grey hydrogen, and provide for an expanded set of end-uses in specific economic sectors, sub-sectors and activities. These end-uses may be technically difficult to decarbonize through other means such as electrification with renewable power. Its main applications are likely to be in heavy industry (e.g. high temperature processes alongside electricity, feedstock for production of green ammonia and organic chemicals, as direct reduction steelmaking), shipping, and long-term energy storage.
