

Can I Donate Plasma If I Smoke Weed

== Weekly routines == 9d2d144d44 In my daily sojourns through Wikipedia, I see many, many trivia sections, on things that one wouldn't expect to have any sort of trivia related to. Say, Condoleezza Rice, Shin-Ra, and such. Should Wikipedia be a nexus for trivia? Large amounts of it is from substandard sources(tabloid, I look upon thee), of no use to one that would visit this site for information(not many people need the fact that the lead singer of some band served on the Committee in Solidarity with the People of El Salvador. If you need more, search for trivia. Now, the page on trivia is nice and important, but the good 19,000 pages behind it are probably not so. We wish to be a center of information on the internet, yes, but is that really necessary? Could the colonists provide the plants with their carbon dioxide while the plants supplied them with oxygen? 9d2d144d44 Unlike bad jokes and other deleted nonsense, however, some of these article names were made for good reasons, on real topics that the writers thought might be useful for Wikipedia. That doesn't always mean that - out of context - the title will be any the less ridiculous-sounding. 9d2d144d44 The question of the origin of the matter in the universe is no longer thought to be beyond the range of science ... everything can be created from nothing ... it is fair to say that the universe is the ultimate free lunch. — Alan Guth, The Inflationary Universe: The Quest for a New Theory of Cosmic Origins 9d2d144d44 Them 9d2d144d44 As to this page's title, consider it a mild addition to the collection of "freaky" titles - the real reason for it was just so that it abbreviates to DAFT. Bewildering titles, bizarre titles, and surreal titles - all are equally fair game. 9d2d144d44 The Human Genome Project has identified 57 human genes coding for the various cytochrome P450 enzymes. 9d2d144d44 The title of the case will be Climate change. I'd like to suggest that, as long as the trivia has a verifiable source, is interesting, and pertinent to the article in question... why not? When I'm looking for information on a subject, I have two resources that I go to first: Wikipedia and Google.... 9d2d144d44 3 Doors Down - The band started out with drummer/vocalist Brad Arnold, bassist Todd Harrell and guitarist Matt Roberts. As they decided to tour outside of their hometown of Escatawpa, Mississippi and into Foley, Alabama, they came up with their official name as they saw a building with a sign with most of its letters fallen off, reading "Doors Down". Since at the time they started out with 3 band members the name stuck and called themselves 3 Doors... 9d2d144d44

Wikipedia:Deleted articles with freaky titles Category:Userpages That Are Full Of LOL [2,020] Category:Users who donate blood plasma [2,021] Category:Vice Presidents who have shot people [2,022] See Strange titles are rarely added to Wikipedia under the guise of real encyclopedia articles. As with other "silly things", often it seems a shame to delete the best of this humor which has been submitted to us. Occasionally, Wikipedians lose their minds (especially on April Fool's Day) and if their posts are good (or strange) enough they wind up here. Silliness can come in the form of creativity, insanity, or just boredom 9d2d144d44

P450s metabolize thousands of endogenous and exogenous chemicals. Some P450s metabolize only one (or a very few) substrates, such as CYP19 (aromatase), while others may metabolize multiple substrates. Both of these characteristics account for medicinal interest. Cytochrome P450 enzymes play roles in hormone synthesis and breakdown (including estrogen and testosterone synthesis and metabolism), cholesterol synthesis, and vitamin D metabolism. Cytochrome P450 enzymes also function to metabolize potentially toxic compounds, including drugs and products of endogenous metabolism such as bilirubin, principally in the liver. 9d2d144d44

Wikipedia:Arbitration/Requests/Case/Climate change/Workshop I think introducing this principle is a smoke screen.
