== Contestants == Historically, the role of homemaker was often assumed by women. However, homemaking can be the full-time responsibility of one spouse, partner, or parent, shared with children or extended family, or shared or traded between spouses/partners as one or both work outside the home. It can also be outsourced partially or completely to paid help (like a house cleaner). The term "homemaker", may also refer to a social worker who manages a household during the incapacity of the housewife or househusband. Home health workers assume the role of homemakers when caring for elderly individuals. This includes preparing meals, giving baths, and any duties the person in need cannot perform... Plot ==

Clothes line g. determine how much heat has been converted in drying a load of laundry, weigh the clothes when they are wet and then again after the clothes have dried A clothes line, also spelled clothesline, also known as a wash line, is a device for hanging clothes on for the purpose of drying or airing out the articles. Longer washing lines often have props holding up the mid-section so the weight of the clothing does not pull the clothesline down to the ground. It is made of any type of rope, cord, wire, or twine that has been stretched between two points (e. two posts), outdoors or indoors, above ground level. Washing lines are attached either from a post or a wall, and are frequently located in back gardens, or on balconies 0edfbf5e6c

Clothing that has recently been washed is hung over the line to dry. Nowadays it is held in place with clothespins, but until the 19th century laundry was simply draped over the line (and often blew away), as is visible in artistic depictions of clotheslines from earlier periods. The clothespin was not invented until 1809. 0edfbf5e6c == Plot == 0edfbf5e6c The small size of these machines, compared to the total space consumed by a separate autowasher and tumble dryer, suits them to small homes, apartments, and condominiums. Combo units typically have a small height, allowing them to fit into confined places. The units are notable for their ability to wash and dry clothes in a single cycle without the need to transfer laundry between two machines. 0edfbf5e6c

The closet rod is often made of a metal pipe such as tubular steel (for example 25 mm or 30 mm), but can also be made of other materials such as wood (typically for aesthetic reasons) or plastic (typically for budgetary reasons). Metal rods have the advantage that they provide low friction against the metal hooks commonly used on clothes hangers, which can make it easier to sort through clothing. Solutions to further reduce the friction have also been patented... 0edfbf5e6c Several types of clothes rails exist. In wardrobes, clothes rails are typically either wall mounted or secured inside the walls of cabinets. Freestanding racks may be suitable as a solution that does not require drilling in walls. There are also special variants such as telescopic rails or over-the-door storage. In retail stores, clothes racks are used for retail display, and often have wheels to make them portable so they can be more easily moved for storage outside shopping hours. 0edfbf5e6c
