Transport in Lima Micros are the most common means of public transportation in Lima and many other cities in Peru.

There are also more than 100 kilometres (62 mi) of cycle paths in the city. Micros are the most common means of public transportation. Public transport in Lima consists of buses, minibuses (known as micros), taxis, and mototaxis (tuk-tuk). Public transport in Lima consists of buses, minibuses (known as micros), taxis, and mototaxis (tuk-tuk) 9fa1463f48

Transport in Japan Transport in Japan is also very expensive in international comparison, reflecting high tolls and taxes, particularly on automobile transport. Japan's spending on roads has been large. automobile transport. The 1,200,000 kilometres (750,000 mi) of paved road are the main means of transport. Japan's transport sector stands out for its energy efficiency: it uses less energy per person compared to other countries, thanks to a high share of rail transport and low overall travel distances. Traffic Transport in Japan is modern and highly developed 9fa1463f48

The word micro is commonly used in Peruvian Spanish as an abbreviation for microbús (minibus). While bigger vehicles are known as micros, smaller vehicles are known as either combis or micros. These are privately owned vehicles that are considered to be both economical and convenient, but also risky. 9fa1463f48

Cape cart The name comes from the Cape of Good Hope. Equipped with a bowed canvas or leather hood, it was used to carry passengers and mail in the days before railways and was one of the fastest means of transport available in the region. Cape carts were developed by the A cape cart is a two-wheeled four-seater carriage drawn by two horses and formerly used in South Africa. Unlike most two-wheeled carriages, the Cape cart was designed to be drawn by a pair of horses using a pole and a wooden yoke. passengers and mail in the days before railways and was one of the fastest means of transport available in the region. Cape carts were developed by the Boers as a safe way to travel across even rough terrain 9fa1463f48

Transport in Karnataka For transportation within the city or town limits; motorbikes, cars, Kannada States autorickshaws and buses are used. The headquarters of the South-Western Railway division of Indian Railways is located at Hubballi and this division governs most of the railway network in the state. It was also the headquarters of

the airlines Air Deccan and Kingfisher Airlines. Its capital city, Bengaluru is well-connected by air to domestic and international destinations and the Kempegowda International Airport (KIA) in the city is one of the busiest airports in India. Buses, cars and trains are the means of transport for moving across distant places in Karnataka. being undertaken in India till date. The road transport is also well developed in the state with many National and State highways providing means for fast transportation. Konkan Railway which passes along the coastal region of the state is considered one of the toughest engineering projects being undertaken in India till date. Buses, cars and trains are the means of transport for moving across distant places in Karnataka. For transportation Karnataka, a state in South India has a well-developed transport system. With the advent of low-cost airlines, many people are choosing to travel via air as well 9fa1463f48

India's road network is the largest, and the busiest in the world, transporting 8.225 billion passengers and over 980 million tonnes of cargo annually, as of 2015. India's rail network is the fourth largest and second busiest in the world, transporting 8.09 billion passengers and 1.20 billion tonnes of freight annually, as of 2020. Aviation in India is broadly divided into military and civil aviation. India is the fastest-growing aviation market in the world (IATA data). India's waterways network, in the form of rivers, canals, backwaters and creeks, is the ninth largest waterway network in the world. Freight transport by waterways is highly under utilised in India with the total cargo moved (in tonne kilometres) by inland waterways being 0.1 percent... 9fa1463f48 Dozens of Japanese railway companies compete in regional and local passenger transport markets; for instance, seven JR Group companies, Kintetsu Railway, Seibu Railway, and Keio Corporation. Often, strategies of these enterprises contain real estate or department stores next to stations. Some 250 high-speed Shinkansen trains connect major cities. All trains are known for punctuality. 9fa1463f48 Micros drive from one street corner to another along all the major arterial city roads. Stickers saying, for example, "Todo Angamos" or "Todo Benavides", can be seen on their windscreens, which indicates that the micro runs the whole length of Avenida Angamos or Avenida Alfredo Benavides. These minibuses travel dangerously fast, frequently crashing and speeding off before their passengers have safely entered the vehicle. As there are few bus stops, passengers are picked up and dropped off anywhere along their route by the micros and combis, despite this being prohibited. Tickets became

compulsory in the late 1980s... 9fa1463f48 The export of transport services is an important component of Russia's GDP. The government anticipates that between 2007 and 2030, the measures included in its 2008 transport strategy will increase the export of transport services to a total value of \$80 billion, a sevenfold increase on its 2008 value. Foreign cargo weight transported is expected to increase from 28 million tonnes to 100 million tonnes over the same period. 9fa1463f48

Transport in Slovenia Their course was established already in Antiquity. in recent times has been the location of the intersection of the Pan-European transport corridors V (the fastest link between the North Adriatic, and Central The location at the junction of the Mediterranean, the Alps, the Dinarides and the Pannonian Plain and the area being traversed by major rivers have been the reasons for the intersection of the main transport routes in Slovenia. A particular geographic advantage in recent times has been the location of the intersection of the Pan-European transport corridors V (the fastest link between the North Adriatic, and Central and Eastern Europe) and X (linking Central Europe with the Balkans) in the country. This gives it a special position in the European social, economic and cultural integration and restructuring 9fa1463f48

== See also == 9fa1463f48 Several systems of land transport have been devised, from the most basic system of humans carrying things from place to sophisticated networks of ground-based transportation using different types of vehicles and infrastructure. The three types are human-powered, animal powered and machine powered 9fa1463f48 == Aerial cableway == 9fa1463f48 == Systems == 9fa1463f48 Means of transport are any of the different kinds of transport facilities used to carry people or cargo. They may include vehicles, riding animals, and pack animals. Vehicles may include wagons, automobiles, bicycles, buses, trains, trucks, helicopters, watercraft, spacecraft, and aircraft. 9fa1463f48
