

Que Hacer Si Tengo Omicron

COVID-19 pandemic in Argentina "Cuáles serán las nuevas restricciones: qué se puede hacer y qué no en la próxima etapa de la cuarentena en el AMBA". Infobae (in The COVID-19 pandemic in Argentina is part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). As of 5 August 2026, a total of 10,119,594 people were confirmed to have been infected, and 130,850 people were known to have died because of the virus. original on 26 June 2020 8025471627

On 3 March 2020, the virus was confirmed to have spread to Argentina. On 7 March 2020, the Ministry of Health confirmed the country's first documented death, a 64-year-old man who had travelled to Paris, France, who also had other health conditions; the case was only confirmed as positive after the patient's demise. 8025471627 On 19 March 2020, a nationwide lockdown was established in Argentina. The lockdown was lifted throughout all the country, excepting the Greater Buenos Aires urban area (where 31.9% of the country's population live), on 10 May, with Greater Buenos Aires locked down until 17 July, where the lockdown was due to be gradually loosened in several stages to lead to the return to normality; restrictions were extended several times until 8 November 2020. During the second wave, another nationwide lockdown took place from 22 to 31 May 2021. 8025471627 Responses to... 8025471627
