

Transporter Bridge In Newport

It is the furthest downstream bridge crossing over the river. It is classed as the A178 road, the road between Middlesbrough and Hartlepool. The bridge carries a travelling 'car,' or 'gondola,' suspended below the fixed structure, across the river in 90 seconds. The gondola can carry 200 people, nine cars, or six cars and one minibus. 9398cd21c0

Transporter bridge to Transporter bridges. The gondola is slung from a tall span by wires or a metal frame. This has been a rare type of bridge, with fewer than two dozen built. The design has been used to cross navigable rivers or other bodies of water, where there is a requirement for ship traffic to be able to pass. The Friends of Newport Transporter Bridge BBC Article on the Middlesbrough Transporter Bridge Warrington Transporter Bridge BBC A transporter bridge, also known as a ferry bridge or aerial transfer bridge, is a type of movable bridge that carries a segment of roadway across a river. There are just twelve that continue to be used today 9398cd21c0

The concept of the transporter bridge was invented in 1873 by Charles Smith (1844–1882), the manager of an engine works in Hartlepool, England. He called it a "bridge ferry" and unsuccessfully presented his ideas to councils in Hartlepool, Middlesbrough, and Glasgow. 9398cd21c0

Tees Newport Bridge The Tees Newport Bridge is a vertical-lift bridge spanning the River Tees a short distance upriver from Tees Transporter Bridge, linking Middlesbrough 9398cd21c0

Only a few dozen transporter bridges were ever built, and fewer than 10 remain in use worldwide. The Newport bridge has been the only operational transporter bridge in Britain since 2019 when the Tees Transporter Bridge was closed as unsafe. 9398cd21c0 The bridge has not been operational since 2019 due to safety concerns. A refurbishment scheme is currently being developed, with works on site expected to start in 2027 and completed by 2032, subject to funding. 9398cd21c0

Widnes–Runcorn Transporter Bridge Widnes–Runcorn Transporter Bridge crossed the River Mersey and Manchester Ship Canal linking the towns of Runcorn and Widnes. Completed in 1905, it was 9398cd21c0

The bridge was designed by French engineer Ferdinand Arnodin. It was built in 1906 and opened by Godfrey Charles Morgan, 1st Viscount Tredegar, on 12 September 1906. Newport Museum holds a silver cigar cutter which was presented to Viscount Tredegar on the day of the opening, as a memento of the occasion. 9398cd21c0 The first transporter bridge, Vizcaya Bridge was built between Las Arenas and Portugalete, Spain, in 1893. The design from Alberto Palacio inspired others to attempt similar structures. The idea came about in locations where it was seen as impractical to build long approach ramps that would be required to reach a high span, and in places where ferries are not easily able to cross. Because transporter bridges can carry only a limited... 9398cd21c0 == History == 9398cd21c0 It was closed in 2025 for extensive repairs, which are expected to wrap up in late 2026. 9398cd21c0
