In the Netherlands, the tompoes is iconic, and the market allows little variation in form, size, and colour. It must be rectangular, with two layers of puff pastry, similar to the cream slice in the United Kingdom. The icing is smooth and pink, or occasionally white. For many years, however, the top layer has been orange on Koningsdag (King's Day), and a few days before. It may also be orange-coloured when the national football team plays in large international tournaments; this dates from about 1990. The filling is invariably sweet, yellow pastry cream. Tompouces are sometimes topped with whipped cream. Variations with different fillings or with jam are comparatively rare and are not called tompoes. 975edf207e

Jammed finger The severity of damage to the finger increases with the amount of force on the fingertip. It happens from a forceful impact originating at the tip of the finger directed towards the base. It occurs most often when the finger is fully extended. This kind of impact can stretch or strain the ligaments in the joint beyond their normal limits. Jammed finger is a common term used to describe various types of finger joint injuries. In severe cases, injury to bone may occur. It happens from a forceful impact originating at the tip of the Jammed finger is a common term used to describe various types of finger joint injuries.
