There is a range of acupuncture technological variants that originated in different philosophies, and techniques vary depending on the country in which it is performed. However, it can be divided into two main foundational philosophical applications and approaches; the first being the modern standardized form called eight principles TCM and the second being an older system that is based on the ancient Daoist wuxing, better known as the five elements or phases in the West. Acupuncture is most often used to attempt pain relief, though acupuncturists say that it can also be used for a wide range of other conditions. Acupuncture is typically used in combination with other forms of treatment. a288dee9e4

Lead poisoning Damage to kidneys can cause changes in urination such as acquired Fanconi syndrome and decreased urine output. People who. anemia and hemoglobin in the urine a288dee9e4

The treatment of fibromyalgia is symptomatic and multidisciplinary. Aerobic and strengthening exercise is recommended. Duloxetine, milnacipran, and pregabalin can give short-term pain relief to some people with FM. Symptoms of fibromyalgia persist long-term in most patients. a288dee9e4

Rape premenstrual distress, fibromyalgia, vaginal discharge, vaginal itching, burning during urination, and generalized vaginal pain. The wrongness of rape is not merely, or on many occasions even primarily, the violence against the body of the victim but the violence against the very person of the victim. The term rape is sometimes used interchangeably with the term sexual assault. The act may be carried out by physical force, coercion, abuse of authority, or against a person who is incapable of giving valid consent, such as one who is unconscious, incapacitated, has an intellectual disability, or is below the legal age of consent (statutory rape). The World Health Organization recommends Rape is a type of sexual assault involving sexual intercourse, or other forms of sexual penetration, carried out against a person without their consent a288dee9e4

The cause of interstitial cystitis is unknown. While it can, it does not typically run in a family. The diagnosis is usually based on the symptoms after ruling out other conditions. Typically the urine culture is negative. Ulceration or inflammation may be seen on cystoscopy. Other conditions which can produce similar symptoms include overactive bladder, urinary tract infection (UTI), sexually transmitted infections, prostatitis, endometriosis in females, and bladder cancer. [a288dee9e4](#) C. tetani is commonly found in soil, saliva, dust, and manure. The bacteria generally enter through a break in the skin, such as a cut or puncture wound caused by a contaminated object. They produce toxins that interfere with normal muscle contractions. Diagnosis is based on the presenting signs and symptoms. The disease does not spread between people. [a288dee9e4](#)

Tetanus Each spasm usually lasts for a few minutes. Spasms occur frequently for three to four weeks. Other symptoms of tetanus may include fever, sweating, headache, trouble swallowing, high blood pressure, and a fast heart rate. In the most common type, the spasms begin in the jaw and then progress to the rest of the body. breathing problems, burning sensation during urination, urinary retention, and loss of stool control. Some spasms may be severe enough to fracture bones. Recovery may take months; about 10% of cases prove to be fatal. Even with treatment, about 10% of people who contract Tetanus (from Ancient Greek τέτανος 'tension', 'stretched', 'rigid'), also known as lockjaw, is a bacterial infection caused by Clostridium tetani and characterized by muscle spasms. The onset of symptoms is typically 3 to 21 days following infection [a288dee9e4](#)

Fibromyalgia is estimated to affect 2 to 4% of the population. Women are affected at a higher rate than men. Rates appear similar across areas of the world and among varied cultures. Fibromyalgia was first recognised in the 1950s, and defined in 1990, with updated criteria in 2011, 2016, and 2019. a288dee9e4 The three main causes are infections, specifically bacterial vaginosis, vaginal yeast infection, and trichomoniasis. Other causes include allergies to substances such as spermicides or soaps or as a result of low estrogen levels during breast-feeding or after menopause. More than one cause may exist at a time. The common causes vary by age. Prepubescent girls are often at risk for development of vulvovaginitis because of low amounts of estrogen and an underdeveloped labia minora. a288dee9e4 There is no cure for interstitial cystitis and management of this condition can be challenging. Treatments that may improve symptoms include lifestyle changes, medications, or procedures. Lifestyle changes may include stopping smoking, dietary changes, reducing stress, and receiving psychological support. Medications may... a288dee9e4
