1863. Local prohibition laws forced him to adapt his recent creation, French Wine Coca. 893679475d Coca-Cola Freestyle fountains have a variation in the form of Coca-Cola Cherry Vanilla, which would later on be released... 893679475d With low sales figures, and the return of Vanilla Coke (now Coca-Cola Vanilla) in the summer of 2007 in the United States, Black Cherry Vanilla Coke was discontinued. 893679475d The drink contains stevia leaf extract, and is the first Coca-Cola variant to use this ingredient. However, it is not the first product owned by the Coca-Cola Company to use stevia. Over 45 products distributed by Coca-Cola use stevia extract, including Vitamin Water and Seagram's Ginger Ale. 893679475d

Caffeine It is mainly used for its eugeroic (wakefulness promoting), ergogenic (physical performance-enhancing), or nootropic (cognitive-enhancing) properties (particularly in workplace settings); it is also used recreationally, often in social settings. The xanthine core of caffeine contains two fused Caffeine is a central nervous system (CNS) stimulant of the methylxanthine class and is the most commonly consumed psychoactive drug globally. protonate it. Caffeine acts by blocking the binding of adenosine at a number of adenosine receptor types, inhibiting the centrally depressant effects of adenosine and enhancing the release of acetylcholine. Caffeine does not contain any stereogenic centers and hence is classified as an achiral molecule. Caffeine also increases cyclic AMP levels through nonselective inhibition of phosphodiesterase, increases

Coca-Cola Life The drink was discontinued in 2020 as part of the Coca-Cola Company discontinuing underperforming brands. It was first released in Argentina and Chile after five years of research together in these countries, before expanding to other markets around the world. The formulation varied by market location, and in some areas the original formulation had been phased out in favor of a zero-calorie version sweetened with stevia only. On April 5, 2017, it was announced that due to Coca-Cola Life was a reduced-calorie version of Coca-Cola introduced in 2013, using a combination of stevia and sugar as sweeteners. years. In 2016, it was reformulated[citation needed] to contain less sugar than regular Coke (45% less) 893679475d

Originally marketed as a temperance drink and intended as a patent medicine, Coca-Cola was invented in the late 19th century by John Stith Pemberton in Atlanta. In 1888, Pemberton sold the

ownership rights to Asa Griggs Candler, a businessman, whose marketing tactics led Coca-Cola to its dominance of the global soft-drink market throughout the 20th and 21st centuries. The name refers to two of its original ingredients: coca leaves and kola nuts (a source of caffeine). The formula of Coca-Cola remains a trade secret; however, a variety of reported recipes and experimental recreations have been published. The secrecy around the formula has been used by Coca-Cola as a marketing aid because only a handful of anonymous employees know the...

Soda geyser The candies catalyze the release of gas from the beverage, which creates an eruption that pushes most of the liquid up and out of the bottle. Lee Marek and "Marek's Kid Scientists" were the first to publicly demonstrate the experiment on the Late Show with David Letterman in 1999. Experiments carried out at altitudes ranging from below sea level in Death Valley to the summit of Pikes Peak have demonstrated that the reaction works better at higher elevations. Steve Spangler's televised demonstration of the eruption in 2005 became popular on YouTube, launching a chain of several other Diet Coke and Mentos experiment viral videos. geyser is a physical reaction between a carbonated beverage, usually Diet Coke, and Mentos mints that causes the beverage to be expelled from its container A soda geyser is a physical reaction between a carbonated beverage, usually Diet Coke, and Mentos mints that causes the beverage to

be expelled from its container 893679475d

In the 1910s, Wint-O-Green Life Savers were used to create soda geysers. The tubes of candies were threaded onto a pipe cleaner and dropped into the soft drink to create a geyser. At the end of the 1990s, the manufacturer of Wintergreen Lifesavers increased the size of the mints, and they no longer fit in the mouth of soda bottles. Science teachers found that Mentos candies had the same... 893679475d Unveiled on July 8, 1982, it was the first new brand since the Coca-Cola Company's creation in 1886 to use the Coca-Cola trademark. Following its launch, Diet Coke/Coca-Cola Light became wildly successful and a cultural status symbol. It has since been a core product and brand for the company, leading worldwide diet soda sales for most of its existence. 893679475d The program was launched in late February 2006, and ended in late June 2017. By November 2006, over a million prizes had been redeemed. The program had since been extended annually since its inception, but terminated on June 30, 2017. Any points left over from one year by one member carried over into the next, provided the member had accrued or debited points within a 90-day period. Current members had from late March to late June 2017 to redeem any points accumulated over the years. Leftover points were then donated to charity. In September 2013, the My Coke Rewards Beta was launched. The new system which ran on the same website, but with /beta after the .com on the address, used social media challenges and My

Energy drink of non-alcoholic psychoactive functional beverage containing stimulant compounds, usually caffeine (at a higher concentration than ordinary soft drinks) An energy drink is a type of non-alcoholic psychoactive functional beverage containing stimulant compounds, usually caffeine (at a higher concentration than ordinary soft drinks) and taurine, which is marketed as reducing tiredness and improving performance and concentration (marketed as "energy", but distinct from food energy). Energy drinks are different from sugar-sweetened beverages. While both energy drinks and sugar-sweetened beverages typically contain high levels of sugar, energy drinks include stimulants like caffeine and taurine and are marketed for energy, and sugar-sweetened beverages like sodas and fruit juices usually are not. They may or may not be carbonated and may also contain sugar, as well as other sweeteners, or herbal extracts, among numerous other possible ingredients 893679475d

Coca-Cola Life formulations typically also contained sugar, but used less sugar than traditional Coca-Cola. In the US, for example, a single 8 US fluid ounces (240 ml) serving contained around 60 calories and 17 grams of carbohydrates from sugar (which constituted about 1/3 less sugar than traditional Coca-Cola per serving)... 893679475d == History == 893679475d
