In Britain, cranberry may refer to the native species *Vaccinium oxycoccos*, while in North America, it may refer to *V. macrocarpon*. The former is cultivated in central and northern Europe, while the latter is cultivated throughout the northern United States, Canada, and Chile. In 2020, the U.S., Canada, and Chile accounted for 97% of the world production of cranberries. Most cranberries are processed into products such as juice, sauce, jam, and sweetened dried cranberries, with the remainder sold fresh to consumers. Cranberry sauce is a traditional accompaniment to turkey at Christmas and Thanksgiving dinners in the U.S. and Canada, and at Christmas dinners in the United Kingdom.
