== Exercise == 7b1ba2b702 Lean construction required the application of a robust programmatic framework to all repair, renovation, maintenance, and or new build activities. While each project may be unique, the application of LEAN fundamental should be applied consistently. Lean construction is concerned with the alignment and holistic pursuit of concurrent and continuous improvements in all dimensions of the built and natural environment: design, construction, activation, maintenance, salvaging, and recycling. This approach tries to manage and improve construction processes with minimum cost and maximum value by considering customer needs. 7b1ba2b702 The Dietary Guidelines for Americans do not specifically address the "Slow-carb Diet". 7b1ba2b702 With these concerns in mind, *Body for Life* addresses energy expenditure (i.e. exercise) in addition to energy input. The human body adapts itself to changes in nutritional intake. If the calorie intake is reduced, the body responds by slowing down its metabolism, and by burning muscle in preference to fat. This reduces the metabolism long-term. When the diet comes to an end and normal calorie intake is restored, the individual starts to gain weight even faster than before. This is known as yo-yo dieting. Diets that focus exclusively on calorie reduction often fail in this way. 7b1ba2b702 At the time of its release, the film was a commercial failure, earning \$8.8 million at the box office against a production budget of \$10 million, as well as mixed reviews, though Griffith's performance earned praise and earned her a nomination for the Golden Globe Award for Best Supporting Actress – Motion Picture.
