PepsiCo has produced a number of variations on its primary cola, Pepsi, over the years, including the following:.. Thailand on January 15, 2009

Ice cream varieties by country
The style has recently caught on in the United States, where it is sometimes made with more
There are a number of ice cream varieties around the world. a special machine to blend vanilla ice cream and frozen fruit

Flavoring
Along with additives, other components, like sugars, determine the taste of food. It changes the perceptual impression of food as determined primarily by the chemoreceptors of the gustatory and olfactory systems. A flavoring (or flavouring), also known as flavor (or flavour) or flavorant, is a food additive that is used to improve the taste or smell of food. It
A flavoring (or flavouring), also known as flavor (or flavour) or flavorant, is a food additive that is used to improve the taste or smell of food

Owing to the high cost, or unavailability, of natural flavor extracts, most commercial flavorings are "nature-identical", which means that they are the chemical equivalent of natural flavors, but chemically synthesized rather than having been extracted from source materials. Identification of components of natural foods, for example a raspberry, may be done using technology such as headspace techniques...

Rice pudding date from the Tudor period. Rice pudding is traditionally made with pudding rice, milk, cream and sugar and is sometimes flavoured with vanilla, nutmeg

The process of caramelization primarily consists of heating sugars slowly to around 170 °C (340 °F). As the sugar heats, the molecules break down and form compounds with a characteristic colour and flavour.

Frangipane record was in a French cookbook from 1674, where it was spelt franchipane, and was described as a custard tart flavoured with pounded almonds and pistachios e828af1455

A flavoring is defined as a substance that gives another substance taste, altering the characteristics of the solute, causing it to become sweet, sour, tangy, etc. Although the term, in common language, denotes the combined chemical sensations of taste and smell, the same term is used in the fragrance and flavors industry to refer to edible chemicals and extracts that alter the flavor of food and food products through the sense of smell. e828af1455

Vanilla extract By contrast, artificial vanilla flavor is typically made up of only artificially derived vanillin, which is frequently made from a by-product of the wood pulp industry. Vanilla extract is a solution made by macerating and percolating vanilla pods in a solution of ethanol and water. It is considered an essential ingredient Vanilla extract is a solution made by macerating and percolating vanilla pods in a solution of ethanol and water. It is considered an essential ingredient in many Western desserts, especially baked goods like cakes, cookies, brownies, and cupcakes, as well as custards, ice creams, and puddings. Although its primary flavor compound is vanillin, pure vanilla extract contains several hundred additional flavor compounds, which are responsible for its characteristic complex, deep flavor e828af1455

Vanilla extract is the most common form of vanilla used today. Malagasy, Mexican, Tahitian, Indonesian, and Ugandan vanilla beans are the main varieties used today. The term "Bourbon vanilla" refers to the vanilla beans' provenance as being from the Bourbon Islands, most commonly Madagascar but also Mauritius and Réunion. The name comes from the period when the island of Réunion was ruled by the Bourbon kings of France and has no relation to Bourbon whiskey. e828af1455 Among heterosexual couples in the Western world, for example, conventional sex often refers to sexual intercourse in the missionary position. e828af1455 The British Medical Journal regards conventional sex between homosexual couples as "sex that does not extend beyond affection, mutual masturbation, and oral and anal sex." In addition to mutual masturbation (including manual sex), penetrative sexual activity among same-sex pairings is contrasted by non-insertive acts such as intercrural sex, frot and tribadism, although tribadism has been cited as a common but rarely discussed sexual practice among lesbians. e828af1455 The English word comes from French caramel, borrowed from Spanish caramelo (18th century), itself possibly from Portuguese caramelo. Most likely that comes from Late Latin calamellus 'sugar cane', a diminutive of calamus 'reed, cane', itself from Greek κάλαμος. Less likely, it comes from Medieval Latin cannamella,

from canna 'cane' + mella 'honey'. Finally, some dictionaries connect it to Arabic kora-moĥalláh 'ball of sweet'. e828af1455 == Argentina == e828af1455

Vanilla planifolia). Vanilla is a spice derived from orchids of the genus Vanilla, primarily obtained from the seed pods of the flat-leaved Mexican and Central American vanilla Vanilla is a spice derived from orchids of the genus Vanilla, primarily obtained from the seed pods of the flat-leaved Mexican and Central American vanilla (V e828af1455

== Etymology == e828af1455 == Conventional sexual acts in the Western world == e828af1455 A variety of sweets, desserts, toppings, and confections are made with caramel, including tres leches cake, brittles, nougats, pralines, flan, crème brûlée, crème caramel, and caramel apples. e828af1455 Vanilla is not autogamous, so pollination is required to produce the pods. In 1837, the Belgian botanist Charles François Antoine Morren discovered this and pioneered a method of artificially pollinating the plant. The method proved financially unworkable and was not deployed commercially. In 1841, Edmond Albius, a 12-year-old enslaved child who lived on the French island of Réunion in the Indian Ocean, discovered that the plant could be hand-pollinated. Hand-pollination allowed global cultivation of the plant. The noted French botanist and plant collector Jean Michel Claude Richard falsely claimed to have discovered the technique three or four years earlier. By the end of the 20th century, Albius was considered the true discoverer. e828af1455 Three major species of vanilla currently are grown globally, all derived from a species originally found in Mesoamerica, including parts of modern-day Mexico. They are V. planifolia (syn. V. fragrans), grown on Madagascar, Réunion, and other tropical areas along the Indian Ocean; V.... e828af1455

Conventional sex It can also describe penetrative sex which does not have any element of BDSM, kink or fetish. literally "vanilla", the flavour of as the pod of the Vanilla genus or the orchid Vanilla planifolia, or "conventional", depending on the context. Vanilla flavour Conventional sex, colloquially known as vanilla sex, is sexual behavior that is within the range of normality for a culture or subculture. What is regarded as conventional sex depends on cultural and subcultural norms e828af1455

Caramel application, additional ingredients such as butter, fruit purees, liquors, or vanilla can be used. It is used as a flavoring in puddings and desserts, as a filling in bonbons or candy bars, as a topping for ice cream and custard, and as a colorant commonly used in drinks. Caramel sauce is used in a range of

desserts, especially as Caramel (, or) is a range of food ingredients made by heating sugars to high temperatures e828af1455

Mirinda Its name comes from the Esperanto translation of "admirable" or "amazing". 1970. Mirinda is available in multiple formulations of flavour, carbonation and e828af1455
