Its heavily distorted and fuzzy guitars, snarling vocals, blunt bass line and energetic drumming contributed to a dirty sound that influenced many local musicians, and helped develop the nascent Seattle grunge scene. According to AllMusic, "the song's raw, primal energy made it an instant anthem which still stands as one of [grunge's] all-time classics". A staple of Mudhoney's live shows, it remains the band's most recognizable song. Sivan remembers "Fully flipping out" upon being shown the track by Lauv during a writing session. The track went through several variations. At one point, the chorus featured four on the floor drum beats, although this version "felt really good". According to Sivan, it felt like a remix and that element was eventually dropped. Lauv would go on to call the single an "accidental duet" explaining "he [Sivan] just sounded too good singing it, so I think it was just natural to do the record together.". McCabe thought it was "good for him [to work with us] cause he must be sick of the pork pie hats and all that. I don't not like British music, but I'm not into that whole London thing [... so] it's probably good for him to do a band like the Zutons cause we're not really like anything else in Britain". During this, they performed at Iceland Airwaves festival in October 2005. d7409f5d32 The outbreaks may or may not be a direct result of inadequate or inappropriate cleaning. SBS has also been used to describe staff concerns in post-war buildings with faulty building aerodynamics, construction materials, construction process, and maintenance. Some symptoms tend to increase in severity with the time people spend in the building, often improving or even disappearing when people are away from the building... d7409f5d32 The main identifying observation is an increased incidence of complaints of such symptoms as headache, eye, nose, and throat irritation, fatigue, dizziness, and nausea. The 1989 Oxford English Dictionary defines SBS in that way. The World Health Organization created a 484-page tome on indoor air quality in 1984, when SBS was attributed only to non-organic causes, and suggested that the book might form a basis for legislation or litigation. d7409f5d32
