Wrist anatomy includes 20 individual ligaments attaching the eight carpal bones between the radius and ulna bones of the forearm and the metacarpal bones of the hand. Location and dynamic function of the wrist ligaments determine susceptibility

to injury. Wrist structures prone to injury are the triangular fibrocartilage complex and the scapholunate ligament. b051f087b4 Pain may be caused after exerting the wrist, as may occur during weight lifting, in any weight-bearing or athletic activity, manual labor, or from injury to nerves, muscles, ligaments, tendons or bones of the wrist. Wrist pain may result from nerve compression, tendonitis, osteoarthritis or carpal tunnel syndrome. b051f087b4 11 β -Methyl-19-nortestosterone b051f087b4 2009 flu pandemic b051f087b4 2014 Democratic Republic of the Congo Ebola virus outbreak b051f087b4 1793 Philadelphia yellow fever epidemic b051f087b4 1863–75 cholera pandemic b051f087b4 2006 North American E. coli O157:H7 outbreak in spinach b051f087b4 5-alpha-reductase inhibitor b051f087b4 == Indications == b051f087b4 ABC (medicine) b051f087b4 1,4-Dioxin b051f087b4 17 β -Dihydroequilin b051f087b4 (von Zumbusch) acute generalized pustular psoriasis b051f087b4 1,1,1,2-Tetrafluoroethane b051f087b4 2003 Midwest monkeypox outbreak b051f087b4 13q deletion syndrome b051f087b4 17 α -Dihydroequilenin b051f087b4 AA amyloidosis b051f087b4 11 α -Hydroxyprogesterone b051f087b4 The radial nerve divides into a deep branch, which becomes the posterior interosseous nerve, and a superficial branch, which goes on to innervate the dorsum (back) of the hand. b051f087b4 2009 flu pandemic in Asia b051f087b4 The natural history of De Quervain tendinopathy (what happens without treatment) is a symptom resolution over about an approximate 1 year period. Symptom alleviation (palliative treatment) is provided mainly by splinting the thumb and wrist. Pain medications such as NSAIDs can also be considered. Steroid injections are commonly used, but are not proved to alter the natural history of the condition. Surgery to release the first dorsal component is an option. b051f087b4 1% rule (aviation medicine) b051f087b4 ASA physical status classification system b051f087b4

De Quervain tendinopathy "De Quervain Tenosynovitis"; StatPearls, Treasure Island (FL): StatPearls Publishing, PMID 28723034, retrieved 12 July 2022 "De Quervain tenosynovitis" De Quervain syndrome or De Quervain tendinopathy occurs when two tendons that control movement of the thumb become enlarged where they pass through their tendon sheath in the wrist. Symptoms can come on gradually or be noted suddenly. The pathophysiology develops gradually. The characteristic symptoms are pain and tenderness on the thumb side of the wrist. Radial abduction of the thumb is painful. On some occasions, there is uneven movement or triggering of the thumb and wrist with radial abduction b051f087b4

== Structure and etiology == b051f087b4 2009 flu pandemic in Spain b051f087b4 The radial nerve and its branches provide motor innervation to the dorsal arm muscles (the triceps brachii and the anconeus) and the extrinsic extensors of the wrists and hands; it also provides cutaneous sensory innervation to most of the back of the hand, except for the back of the little finger and adjacent half of the ring finger (which are innervated by the ulnar nerve). b051f087b4 AIDS VAX b051f087b4 It originates from the brachial plexus, carrying fibers from the posterior roots of spinal nerves C5, C6, C7, C8 and T1.

Intersection syndrome Differential diagnoses Differential diagnoses include: De Quervain syndrome/De Quervain's tenosynovitis Thumb Intersection syndrome is a painful inflammatory condition affecting the thumb-side of the wrist and forearm on the back of the arm. Intersection syndrome occurs where the compartment containing the muscles that help move the thumb crosses over the compartment containing the muscles that help extend the wrist. reveal tenosynovitis and peritendinous edema. The wrist and forearm contain several compartments of extensor muscles that help move the wrist, hand, and fingers b051f087b4

Special:WhatLinksHere/Template:Medical resources. b051f087b4 The first dorsal extensor compartment contains the abductor pollicis longus and extensor pollicis brevis muscles and their tendons, which contribute to thumb motion. The second extensor compartment contains the extensor carpi radialis longus and the extensor carpi radialis brevis muscle bellies and tendons, which contribute to wrist extension. Intersection syndrome involves these two compartments and is a type of tenosynovitis that develops gradually. The mechanism of injury is usually repetitive resisted extension, as with rowing, weight lifting, or pulling. b051f087b4 == Signs and symptoms == b051f087b4 ICD-10 browser b051f087b4 1993 Four Corners hantavirus outbreak b051f087b4 (R,R)-Tetrahydrochrysene b051f087b4 Wrist sprains may occur when a ligament is ruptured or lacerated in severe trauma, stretched or twisted. Radial nerve The brachial artery Cutaneous nerves The radial nerve is a nerve in the human body that supplies the posterior portion of the upper limb. Finkelstein's test may be positive. It innervates the medial and lateral heads of the triceps brachii muscle of the arm, as well as all 12 muscles in the posterior osteofascial compartment of the forearm and the associated joints and overlying skin. radial wrist pain, and close resemblance to symptoms in de Quervain's tenosynovitis b051f087b4

(S,S)-Tetrahydrochrysene b051f087b4 The term "spica splint" (also known as "thumb spica splint") refers to immobilization of the lateral aspect of the thumb. There are multiple variations of the splint including short-arm thumb spica, long-arm thumb spica, and prefabricated braces. These splints can be constructed using plaster, fiberglass, or fabric. Splints can be used for definitive intervention in milder, soft-limiting injuries. They may also be used as a pre-surgical immobilization measure, post-operatively, or for temporary use following removal of a hand/thumb cast. b051f087b4 Check as many of these articles as you can and, if needed, fill in the missing ICD-11 code(s)! b051f087b4 10/90 gap b051f087b4 Symptoms are... b051f087b4 A
