The topographic isolation (or radius of dominance) of a summit measures how far the summit lies from its nearest point of equal elevation. The third table below ranks the 25 most isolated major summits of Central America. 6a57f967dc

1000 Islands Tower Built and opened on June 15, 1965, the tower provides panoramic views over the Thousand Islands of both countries, from a height of 400 feet (120 m) above the St. Built and opened The 1000 Islands Tower is a concrete observation tower, on Hill Island, in Ontario, about 620 meters from the border of New York State. Lawrence River. The 1000 Islands Tower is a concrete observation tower, on Hill Island, in Ontario, about 620 meters from the border of New York State 6a57f967dc

Stadiametric rangefinding The term stadia comes from a Greek unit of length Stadion (equal to 600 Greek feet, pous) which was the typical length of a sports stadium of the time. It is still widely used in long-range military sniping,

but in many professional applications it is being replaced with microwave, infrared, or laser rangefinding methods. Although much easier to use, electronic rangefinders can give away the shooter's position to a well-equipped adversary, and the need for accurate range estimation has existed for much longer than electronic rangefinders small and rugged enough to be suitable for military use. Since the radian expresses a ratio, it is independent of the units used; an object 6 feet Stadiametric rangefinding, or the stadia method / stadiametry, is a technique of measuring distances with a telescopic instrument. meters, or 5 mrad at 1000 meters, or 25 mrad at 200 meters. Stadiametric rangefinding is used for surveying and in the telescopic sights of firearms, artillery pieces, or tank guns, as well as some binoculars and other optics 6a57f967dc

(in English and French) Sports-reference. 5 meter (8 feet). Wallechinsky The men's K-4 1000 metres event was a fours kayaking event conducted as part of the Canoeing at the 2000 Summer Olympics program 6a57f967dc

The topographic elevation of a summit measures the height of the summit above a geodetic sea level. The first table below ranks the 20 highest major summits of the Caribbean by elevation.

The summit of a mountain or hill may be measured in three principal ways:

The topographic elevation of a summit measures the height of the summit above a geodetic sea level. The first table below ranks the 40 highest major summits of

Greenland by elevation. The topographic prominence of a summit is a measure of how high the summit rises above its surroundings. The second table below ranks the 13 major summits of Hawai'i by topographic prominence.

The topographic elevation of a summit measures the height of the summit above a geodetic sea level. The first table below ranks the 25 highest major summits of Central America by elevation. The topographic isolation (or radius of dominance) of a summit measures how far the summit lies from its nearest point of equal elevation. The third table below ranks the 40 most isolated major summits of Greenland. The topographic prominence of a summit is a measure of how high the summit rises above its surroundings.

List of mountain peaks of the Caribbean Of these

This article comprises three sortable tables of major mountain peaks of the islands of the Caribbean Sea. Duarte exceeds 3000 meters (9843 feet) elevation, six peaks exceed 2000 meters (6562 feet), and 15 peaks exceed 1000 meters (3281 feet) elevation 6a57f967dc

The Lake Superior Lowland is defined by a plain that slopes gently downward towards the north. While the area is mostly flat, the altitude ranges from about 600 feet (180 m) to 1000 feet (or 300 meters) above sea level. The higher altitudes are located on the Bayfield Peninsula, where the characteristic plain gives way to more rugged hills. Northeast of the peninsula are the Apostle Islands, which have been designated as a National Lakeshore. 6a57f967dc Woodland covers most of the Lake Superior Lowland. Much of the forested area is dominated by aspen and birch trees, with some conifers interspersed throughout the forest. Some pasture and cropland has been established on the plain. Marshes and wetlands exist in a few places in the region, and several rivers drain the region into Lake Superior, including the Brule River, which is surrounded by a State Forest. Two Ojibwa Indian reservations... 6a57f967dc
