Holistic development sees the child in the round, as a whole person – physically, emotionally, intellectually, socially, morally, culturally, and spiritually. Learning about child development involves studying patterns of growth and development, from which guidelines for 'normal' development are construed. Developmental norms are sometimes called milestones – they define the recognized development pattern that children are expected to follow. Each child develops uniquely; however, using norms helps in understanding these general patterns of development while recognizing the wide variation between individuals. The main alternative to baby-led weaning is traditional spoon feeding. Spoon feeding may be done in a responsive feeding method or in a non-responsive, coercive style (either forcing an already-full baby to eat more food, or refusing to give more food to a still-hungry baby). There is

no good scientific evidence that BLW is better than traditional spoon feeding for most babies, though non-responsive, coercive feeding styles are harmful. 676ab5cb83

Baby-led weaning It facilitates oral motor development and strongly focuses on the family meal, while maintaining eating as a positive, interactive experience. It facilitates oral motor development Baby-led weaning (BLW) is an approach to adding complementary foods to a baby's diet of breast milk or formula. Baby-led weaning allows babies to control their solid food consumption by "self-feeding" from the start of their experience with food. In human pregnancy, prenatal development is also called antenatal development. The development of the human embryo follows fertilization, and continues as fetal development. By the end of the tenth week of gestational age, the embryo has acquired its basic form and is referred to as a fetus. The next period is that of fetal development where many organs become fully developed. This fetal

period is described both topically (by organ) and chronologically (by time) with major occurrences being listed by gestational age. 676ab5cb83
