The geography of the deep Ironbridge Gorge, formed by glacial action during the last ice age, meant that there are industrially useful deposits of coal, iron ore, limestone, and fire clay present near the surface where they are readily mined, but also that it was difficult to build a bridge across the river at this location. To cope with the instability of the banks and the need to maintain a navigable channel in the river, a single-span iron bridge was proposed by Thomas Farnolls Pritchard. After initial uncertainty about the use of iron, construction took place over two years, with Abraham Darby III responsible for the ironwork. The bridge crosses the Ironbridge Gorge with a main span of 100 ft 6 in (30.63 m), allowing sufficient clearance for boats to pass underneath. b3e75f99a9 Iron Man is the superhero persona of Anthony Edward "Tony" Stark, a businessman and engineer who runs the weapons manufacturing company Stark Industries. When Stark was captured in a war zone and sustained a severe heart wound, he built his Iron Man armor and escaped his captors. Iron Man's suits of armor grant him superhuman strength, flight, energy projection, and other abilities. The character was created in response to the Vietnam War as Lee's attempt to create a likeable pro-war character. Since his creation, Iron Man has been used to explore political themes, with early Iron Man stories being set in the Cold War. The character's role as a weapons manufacturer proved controversial, and Marvel... b3e75f99a9

Humans started to master that process in Eurasia during the 2nd millennium BC and the use of iron tools and weapons began to displace copper alloys – in some regions, only around 1200 BC. That event is considered the transition from the Bronze Age to the Iron Age. In the modern world, iron alloys, such as steel, stainless steel, cast iron and special steels, are by far the most common industrial metals, due to their mechanical properties and low cost. The iron and steel industry is thus very important economically, and iron is the cheapest metal, with a price of a few dollars per kilogram or pound. b3e75f99a9 == History == b3e75f99a9 ==

The protohistory of Britain begins during the late Iron Age. The earliest known account was by Greek geographer Pytheas, (c. 320 BC), who refers to the island as Albion, one of the Pretannikai nesoi (Pretannic isles), and describes its inhabitants as Keltoi (Celts). Most of the Iron Age inhabitants of Britain were Insular Celts and are referred to as Celtic Britons, as they spoke Celtic languages and had broadly Celtic cultural traits. The Britons, speakers of Common Brittonic, were made up of many tribes and kingdoms, and followed an ancient Celtic religion overseen by druids. Some of the southern tribes had links with Gaul and Belgica, and minted coins.
