Abdominal distension In the most extreme cases, upward pressure on the diaphragm and lungs can also cause shortness of breath. People with this condition often describe it as "feeling bloated". One of the causes of abnormal bloating is excessive eating and air swallowing, known as aerophagia. It is typically a symptom of an underlying disease or dysfunction in the body, rather than an illness in its own right. Other causes of bloating and distension Abdominal distension occurs when substances, such as air (gas) or fluid, accumulate in the abdomen causing its expansion. The pressure sensation is often relieved, or at least lessened, by belching or flatulence. distension. Medications that settle gas in the stomach and intestines are also commonly used to treat the discomfort and lessen the abdominal distension. Affected people often experience a sensation of fullness, abdominal pressure, and sometimes nausea, pain, or cramping. Through a variety of causes
