According to the administrative divisions of China, there are three major levels of cities, namely direct-administered municipalities (直辖市), prefecture-level cities (副省级市), and county-level cities (县级市). Not included in this administrative classification list are the special administrative regions (特别行政区) of Hong Kong and Macau as well... 827a35d5b8 == 50 states and the District of Columbia == 827a35d5b8 Note 1: The only incorporated place in Hawaii is the City & County of Honolulu. A portion of it, the Honolulu District, is sometimes regarded as the "city" for statistical purposes, although it has no government separate from that of the City and County as a whole. The U.S. Census Bureau defines Honolulu CDP (census-designated place) to coincide with the Honolulu District. Thus for Hawaii, the largest CDPs are ranked, as of the 2020 United States census. 827a35d5b8 == Largest cities == 827a35d5b8 The country currently has 5,571 cities, with 5,569 municipalities plus the capital (Brasília) and the Island of Fernando de Noronha. With two exceptions, the state capitals are all the largest cities in their respective states: Florianópolis, the capital of Santa Catarina is its second-largest city after Joinville, while Vitória is only the fourth-largest city in Espírito Santo, although it is located in that state's largest metropolitan area. 827a35d5b8

The human population experienced continuous growth following the Great Famine of 1315–1317 and the end of the Black Death in 1350, when it had reached nearly 370 million. The highest global population growth rates, with increases of over 1.8% per year, occurred between 1955 and 1975, peaking at 2.1% between 1965 and 1970. The growth rate declined to 1.1% between 2015 and 2020 and is projected to decline further in the 21st century. The global population is still increasing, but there is significant uncertainty about its long-term trajectory due to changing fertility and mortality rates. The UN Department of Economics and Social Affairs (UNDESA) has projected the world population to reach between 9 and... 827a35d5b8

By the end of the century, the world population is projected Human population projections are attempts to show how human populations might change in the future. Models of population growth take trends in human development and apply projections into the future. These models use trend-based assumptions about how populations will respond to economic, social

and technological forces to understand how they will affect fertility and mortality, and thus population growth. These projections are an important input to forecasts of the population's impact on the planet and humanity's future well-being

List of largest cities The Chinese municipality of Chongqing, which is the largest city proper in the world by population The United Nations uses three definitions for what constitutes a city, as not all cities in all jurisdictions are classified using the same criteria. the core urban area into suburban and rural areas. Cities may be defined as the cities proper, their metropolitan regions, or the extent of their urban area. A complicating factor is that many large cities in the world have not only homeless or the unhoused, but also vast slum communities. This leads to official census data being less accurate in representing the actual number of residents in a given area 827a35d5b8

This list refers only to the population of individual municipalities within their defined limits; the populations of other municipalities considered suburbs of a central city are listed separately, and unincorporated areas within urban agglomerations are not included.
