PhDs are awarded for programs across the whole breadth of academic fields. Since it is an earned research degree, those studying for a PhD are required to produce original research that expands the boundaries of knowledge, normally in the form of a dissertation, and, in some cases, defend their work before a panel of other experts in the field. In many fields, the completion of a PhD is typically required for employment as a university professor, researcher, or scientist. b88668da12

In the seventh line, the poet makes a nautical reference, alluding to love being much like the north star is to sailors. True love is, like the polar star, "ever-fixed". Love is "not Time's fool", though physical beauty is altered by it. The movement of 116, like its tone, is careful, controlled, laborious...it defines and redefines its subject in each quatrain, and this subject becomes increasingly vulnerable.It starts out as motionless and distant, remote, independent; then it moves to be "less remote, more tangible and earthbound"; the final couplet brings a sense of "coming back down to earth". Ideal love is maintained as unchanging throughout the sonnet, and Shakespeare concludes in the final couplet that he is either correct in his estimation of love, or else that no man has ever truly loved. b88668da12 == Early life == b88668da12 Publication of the Bulletin of the EATCS; b88668da12

When a layered constituency-based analysis of sentence structure is used, inversion often results in the discontinuity of a constituent, but that would not be the case with a flatter dependency-based analysis. In that regard, inversion has consequences similar to those of shifting. == Classification == Kamëntšá appears to be a language isolate. Researchers have tried connecting it to the Chibchan languages without success. Fabre reports that the Kamëntšá are descended, at least in part, from the Quillasinga, whose language is unattested.
