Diabetes management In addition to lifestyle modification, some individuals with type 2 diabetes may require medication to adequately control their blood glucose levels. Other goals of diabetes management are prevention or treatment of complications that can result from the disease itself and from its treatment. Long-term glucose levels (over 3 months) can also be measured by analysis of a blood sample. Common names of these medications include semaglutide (Ozempic and Wegovy), liraglutide (Victoza, Saxenda), and dulaglutide (Trulicity) Diabetes mellitus is a metabolic disease that is characterized by chronic elevated blood glucose levels (hyperglycemia). If diabetes is not well controlled, health challenges may develop. People with diabetes can measure blood glucose by various methods, such as with a glucose meter or a continuous glucose monitor, which monitors over several days. and cholesterol. Therefore, the main goal of diabetes management is to keep blood glucose levels within normal limits (or a diabetic target range) as often as possible 6171b92817

In 2018, the company rebranded to "WW" to reflect "its development from focusing on weight loss to overall health and wellness." 6171b92817
