

Difference Between Hemp And Weed

Effective July 1, 2015 (per Section 82(1)) the measure legalizes the possession and use of marijuana for adults 21-years of age or older. Adults can carry up to one ounce of marijuana, keep up to eight ounces at home per household, and grow up to four plants per household.

2014 Oregon Ballot Measure 91 Hemp News. Archived from the original on September 5, Oregon Ballot Measure 91 was a 2014 ballot measure in the U. Major Endorsements For Marijuana Legalization". S. Campaign for the Restoration and Regulation of Hemp. Its passage legalized the "recreational use of marijuana, based on regulation and taxation to be determined by the Oregon Liquor Control Commission". state of Oregon

Some varieties of Cannabis: a subgroup of the varieties or cultivars of the Cannabis species; On 24 February 2016, Australia legalised growing of cannabis for medicinal and scientific purposes at the federal level. On 12 November 2017, Food Standards Australia New Zealand (FSANZ) made low-THC hemp food legal for human consumption in Australia. On 25 September 2019, the Australian Capital Territory passed a bill allowing for possession and growth of small amounts of cannabis for personal use as of 31 January 2020, although the laws conflict with federal laws that prohibit recreational use of cannabis and the supply of cannabis and cannabis seeds are not allowed under the changes. Only Cannabis plants grown as a source of fiber and/or seed (and not...
Implementation In 1785, Jean-Baptiste Lamarck published a description of a second species of Cannabis, which he named Cannabis indica. Lamarck based his description of the newly named species on plant specimens collected in India. Richard Evans Schultes described C. indica as relatively short, conical, and densely branched, whereas C. sativa was described as tall and laxly branched. Loran C. Anderson described C. indica plants as having short, broad... The plant is also known as hemp, although this term is usually used to refer only to varieties cultivated for non-drug use. Hemp has long been used for fibre, seeds and their oils, leaves for use as vegetables, and juice. Industrial hemp textile products are made from cannabis plants selected to produce an abundance of fibre.
Historical background

Kudzu are closely related, and some of them are considered to be varieties rather than full species. It is invasive in many parts of the world, primarily North America. The morphological differences between the subspecies of P Kudzu (), also called Japanese arrowroot or Chinese arrowroot, is a group of climbing, coiling, and trailing deciduous perennial vines native to much of East Asia, Southeast Asia, and some Pacific islands

Taxonomy

Cannabis strain recreational and medicinal use. Several varieties of cannabis, known as hemp, have Cannabis strains is a popular name to refer to plant varieties of the monospecific genus Cannabis sativa L. ruderalis. These varieties have been cultivated to contain a high percentage of cannabinoids. indica, and C. They are either pure or hybrid varieties of the plant, which encompasses various sub-species C. sativa, C

Charas The difference between charas and hashish is that hashish is made from a dead cannabis plant and charas is made from a live one. The plant grows wild throughout Northern India along the stretch of the Himalayas (its putative origin) and is an important cash crop for the local people. The difference between charas and hashish is that hashish is made from a dead cannabis plant and charas Charas is a cannabis concentrate made from the resin of a live cannabis plant (Cannabis sativa either Indica subspecies or Sativa subspecies) and is handmade in the Indian subcontinent. and is an important cash crop for the local people

The vine densely climbs over other plants and trees and grows so rapidly that it smothers and kills them by blocking most of the sunlight and taking root space. The plants are in the genus Pueraria, in the pea family Fabaceae, subfamily Faboideae. The name is derived from the Japanese name for the plant East Asian arrowroot, (Pueraria montana var. lobata), kuzu (葛根). Where these plants are naturalized, they can be invasive and are considered noxious weeds. The plant is edible, but often sprayed with herbicides.
Major variety types

History of cannabis in Italy Known as canapa in Italian, the historical ubiquity of hemp is reflected in the different variations of the name given to the plant in the various regions, including canape, càneva, canava, and canva (or canavòn for female plants) in northern Italy; canapuccia and canapone in the Po Valley; cànnavo in Naples; cànnavu in Calabria; cannavusa and cànnavu in Sicily; cànnau and cagnu in Sardinia. For a long time after the fall of Rome in the 5th century A. D. , the cultivation of hemp, although present in several Italian regions, mostly consisted in small-scale productions aimed at satisfying the local needs for fabrics and ropes. economic models were implemented between the 15th and 19th centuries for the cultivation of hemp, and their primary differences essentially derived from the The cultivation of cannabis in Italy has a long history dating back to Roman times, when it was primarily used to produce hemp ropes, although pollen records from core samples show that Cannabaceae plants were present in the Italian Peninsula since at least the Late Pleistocene, while the earliest evidence of their use dates back to the Bronze Age

Attitudes towards legalising recreational cannabis in Australia have shifted over the last decade. According to polling by the National Drug Strategy Household Survey (NDSHS) in 2019, more Australians now support legalisation of cannabis than remain opposed. In 2019, the survey reported that... 44f5d236f4

Hemp Regarding the Cannabis The term hemp is the vernacular English language word designating the plant *Cannabis sativa*, a plant that can be used to make a wide range of products, and be refined into a variety of commercial items, including paper, rope, textiles, clothing, biodegradable plastics, paint, insulation, biofuel, food, medicines, and animal feed. These include Manila hemp, bog hemp, sisal hemp, New Zealand hemp, Deccan hemp, or Madras hemp (also at times called Indian hemp). Along with bamboo, hemp is among the fastest growing plants on Earth and was also one of the first plants to be spun into usable fiber 50,000 years ago 44f5d236f4

Cannabis in Italy driving licenses) for repeat offenders. *cannabis* light). Italian hemp are Switzerland, France, Luxembourg, Spain, and the United Kingdom, the first three of which were the fastest growing ones between 2019 and 2020; *Cannabis* is legal for medical and industrial uses in Italy, although it is strictly regulated, while it is decriminalized for recreational uses. a. The possible sanctions for possession vary from the issuing of a *diffida* to first offenders, which is an injunction not to use the drug again; to the temporary suspension of certain personal documents (e. The licensed cultivation of cannabis for medical and industrial purposes requires the use of certified seeds; however, there is no need for authorization to plant certified seeds with minimal levels of psychoactive compounds (a. In particular, the possession of small amounts of marijuana for personal use is a civil infraction. k. g. Conversely, the unauthorized sale of cannabis-related products is illegal and punishable with imprisonment, as is the unlicensed cultivation of cannabis, although 2010s court cases have effectively established the legality of cultivating small amounts of cannabis for exclusively personal use 44f5d236f4

Measure 91 was the third initiative seeking to legalize marijuana for recreational use in Oregon; previous measures were 1986's Measure 5 and 2012's Measure 80 while medical use of marijuana was legalized in Oregon in 1998. Measure 91 passed by approximately 56% to 44%. Most polls leading up to the election showed majority support for legalizing recreational marijuana use among adults. 44f5d236f4

Cannabis as hemp, although this term is usually used to refer only to varieties cultivated for non-drug use. *ruderalis* may be included within *C*. However, the number of species is disputed, with as many as three species being recognized: *Cannabis sativa*, *C*. Alternatively, *C*. Hemp has long been used for fibre, seeds and their *Cannabis* () is a genus of flowering plants in the family *Cannabaceae* that is widely accepted as being indigenous to and originating from the continent of Asia. *sativa*, or all three may be treated as subspecies of *C. indica*, and *C. ruderalis*. *sativa*, or *C. sativa* may be accepted as a single undivided species 44f5d236f4

Varieties are developed to intensify specific characteristics of the plant, or to differentiate the strain for the purposes of marketing or to make it more effective as a drug. Variety names are typically chosen by their growers, and often reflect properties of the plant such as taste, color, smell, or the origin of the variety. The *Cannabis* strains referred to in this article are primarily those varieties with recreational and medicinal use. These varieties have been cultivated to contain a high percentage of cannabinoids. Several varieties of cannabis, known as hemp, have a very low cannabinoid content, and are instead grown for their fiber and seed. Due to the legal status of the plant in many jurisdictions, *Cannabis* plant varieties are at high risk of biopiracy. 44f5d236f4

Cannabis indica The high concentrations of THC or THCV provide euphoric effects making it popular for use for several purposes, not only simple pleasure but also clinical drug research, potential new drug research, and use in alternative medicine, among many others. The plant produces large amounts of tetrahydrocannabinol (THC) and tetrahydrocannabivarin (THCV), with total cannabinoid levels being much higher than observed in industrial hemp varieties. tetrahydrocannabinol (THC) and tetrahydrocannabivarin (THCV), with total cannabinoid levels being much higher than observed in industrial hemp varieties. It is *Cannabis indica* is an annual plant species in the family *Cannabaceae* indigenous to the Hindu Kush mountains of Southern Asia. It is now widely grown in China, India, Nepal, Thailand, Afghanistan, and Pakistan, as well as southern and western Africa, and is cultivated for purposes including hashish in India 44f5d236f4

All forms of *Cannabis* (particularly in older texts), with types differentiated binomially (Winter hemp, Summer hemp, Indian hemp...); 44f5d236f4 *Cannabis* also has a long history of being used for medicinal purposes, and as a recreational drug known by several slang terms, such as marijuana, pot or weed. Various cannabis strains have been bred, often selectively to produce high or low levels of tetrahydrocannabinol (THC), a cannabinoid and the plant's principal psychoactive constituent. Compounds such as hashish and hash oil are extracted... 44f5d236f4 The term "hemp" has also traditionally been used as a generic name to refer to various fibrous plants, which have no botanical relation with *Cannabis*. These include Manila hemp, bog hemp, sisal hemp, New Zealand hemp, Deccan hemp, or Madras hemp (also at times called Indian hemp). 44f5d236f4 The mass cultivation of industrial cannabis for the production of hemp fiber in Italy really took off during the period of the Maritime Republics and the Age of Sail, due to its strategic importance for the naval industry... 44f5d236f4

Cannabis in Australia Australia has one of the highest cannabis prevalence rates in the world. Elliot, T. 5% had used cannabis in the last 12 months. Retrieved 8 December 2020.
