A secondary function is to record the dive profile, warn the diver when A dive computer, personal decompression computer or decompression meter is a device used by an underwater diver to measure the elapsed time and depth during a dive and use this data to calculate and display an ascent profile which, according to the programmed decompression algorithm, will give a low risk of decompression sickness. A secondary function is to record the dive profile, warn the diver when certain events occur, and provide useful information about the environment. Dive computers are a development from decompression tables, the diver's watch and depth gauge, with greater accuracy and the ability to monitor dive profile data in real time

DayZ began development in 2012 when the mod's creator, Dean Hall, joined Bohemia Interactive to commence work on the standalone version of the game. The development has been focused on altering the engine to suit the game's needs, developing a working

client-server architecture, and introducing new features like diseases and a better inventory system. The game sold over four million copies during its early access phase. In Obduction, the player's character has been abducted from Earth by aliens and transported to one of several alien worlds, with the goal of trying to find a way home. The game, played out as an adventure game from the first-person perspective, has the... The game was funded via a Kickstarter campaign in October 2013, and was released in August 2016 for Windows-based PCs, with a macOS version released in March 2017. A virtual reality version for Oculus Rift system was published in November 2016, while HTC Vive and Oculus Touch versions were released on March 22, 2017. The PlayStation 4 version was launched in August 2017 with a patch arriving shortly afterwards to support PlayStation VR. The Xbox One version of the game was released on April 10, 2020.
