The current event began as an annual occurrence in 1994, but it traces its history and name to a disco held in Buffalo in 1979, organized by Glenn Arnette, then-director of the Buffalo Convention Center, along with Bruce Marsh and Steve LaManna. The event, featuring The Trammmps and Gloria Gaynor, was marked in Guinness World Records as the largest disco in the history, with 13,000 people in attendance. The current incarnation of the event draws 7,000, though this is only because of capacity issues; ticket sales were capped at 7,000 after the 1997 event also drew over 13,000 fans, well over the convention center's capacity. Tickets for the event regularly sell out within minutes of being put on sale, which usually occurs in early August. 119ce9b00a When considering singular entities, the largest organisms are clonal colonies which can spread over large areas. Pando, a clonal colony of the quaking aspen tree, is widely considered to be the largest such organism by mass. Even if such colonies are excluded, trees retain their dominance of this listing, with the giant sequoia being the most massive tree. In 2006, a huge clonal colony of the seagrass *Posidonia oceanica* was discovered south of the island of Ibiza. At 8 kilometres (5 mi) across, and estimated at 100,000 years old, it may be one of the largest and oldest clonal colonies on Earth. 119ce9b00a == By average values of GDP == 119ce9b00a

At the end of the Second World War, at least 40 million people had been displaced from their home countries, with about eleven million in Allied-occupied Germany. Among those, there were around 1.2 million people who refused to return to their countries of origin. These included former prisoners of war, released slave laborers, and both non-Jewish and Jewish concentration-camp survivors, though the majority tended to be Jewish.
