

How Is Chewing Gum Made

Chewing gum Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Its texture is reminiscent of rubber because of the physical-chemical properties of its polymer, plasticizer, and resin components, which contribute to its elastic-plastic, sticky, chewy characteristics. Modern chewing gum is composed of gum base, sweeteners, softeners/plasticizers, flavors, colors, and, typically, a hard or powdered polyol coating 01d666aa30

PÜR Gum PUR products are also sold through online outlets such as Amazon. == History == 01d666aa30 == History == 01d666aa30 5 gum was introduced in the United States in March 2007, in Canada in January 2008, in Russia, Europe and Australia in 2009, and in China, India, Italy, the Middle East, Egypt, Thailand, and Malaysia in 2010. When introduced to new markets, 5 would be stylized and branded as "New 5 Gum". 01d666aa30 Key: 01d666aa30 The Orbit brand was reintroduced 30 years later in 1976, when it was introduced in Germany, Switzerland and The Netherlands. This marked the first time that a sugar-free gum was marketed under the Wrigley name. The brand was later introduced in many other countries around the world. In the US, Orbit launched in 1977 but ran into trouble because of its xylitol... 01d666aa30 In modern chewing gum, if natural rubber such as chicle is used, it must pass several purity and cleanliness tests. However, most modern types of chewing gum use synthetic gum-based materials and chemicals such as sugar and artificial flavoring chemicals. These materials allow for longer lasting flavor, a softer texture, and a reduction in tackiness. Polyol and Xylitol are two carbohydrate sugars that are used in the production of bubble gum and chewing gum. Rubbers are one additive that are in both bubble gum and chewing gum; however, the components of the rubber in the bubble gum are larger in mass than in chewing gum. 01d666aa30 == Composition == 01d666aa30 For almost a century, the Wrigley Company continuously marketed three brands of gum: Wrigley's Spearmint, Doublemint, and Juicy Fruit. Since the late 20th century, it has expanded and created multiple more brands.

Wm. Wrigley's became a subsidiary of Mars Inc. in 2008, and, along with Mars chocolate bars and other candy products, makes up "Mars Wm. Wrigley Confectionery" (now Mars Snacking).

Stride (gum) Stride is a brand of sugar-free chewing gum introduced in June 2006 by Cadbury-Adams and owned by Mondelez International, sold in packs of 14 pieces. By 01d666aa30

Wm. Wrigley marketed an Orbit gum in 1940s in the United States as a replacement brand by Wm. Wrigley due to rationing of gum-making ingredients in World War II. The brand was discontinued after the war ended, when Wm. Wrigley's three established gum brands, Juicy Fruit, Wm. Wrigley's Spearmint and Doublemint, returned to the US market. 01d666aa30 Nicotine

gum is available via general, pharmaceutical, and online sales without the need for a prescription. Flavor options range from mint and cinnamon to various fruit flavors, and doses range from 2–6 mg, though it is most commonly sold in 2 and 4 mg strengths. Common side effects include mouth irritation or ulcers, jaw pain, and hiccups. Although nicotine in tobacco products is associated with increased cardiovascular risk, hyperlipidemia, and increased insulin resistance, there is insufficient evidence to demonstrate that nicotine found in nicotine gum has the same health effects. The Food and Drug Administration (FDA) states that nicotine is the addictive chemical in tobacco, but that the mix of thousands of chemicals in tobacco and tobacco smoke, rather than nicotine, is what causes serious disease and death in tobacco users.

01d666aa30

The Orbit name in chewing gums dates back to the early 20th century. It was made as Orbit Listerated Gum, by the Common Sense Co. (later known as Listerated Gum Corp.). The Orbit trademark went to Wrigley when it bought Listerated Gum Corp in 1925. The company currently sells its products in 184 countries and districts, operates in 62 countries, and has 21 production facilities in 14 countries.
