In 2007 it came preloaded on the first iPhone in a deal Google Maps is a web mapping platform and consumer application developed by Google. It was released as Google Maps for Mobile in 2006. It offers satellite imagery, aerial photography, street maps, 360° interactive panoramic views of streets (Street View), real-time traffic conditions, and route planning for traveling by foot, car, bike, and public transportation. 2005 for mobile platforms supporting J2ME 995b052052

The common components found on all phones are: 995b052052 In August 2024, the United States District Court for the District of Columbia ruled that Google held an illegal monopoly over Internet

search and search advertising. The court found that Google maintained its market... 995b052052 All GSM phones use a SIM card to allow an account to be swapped among devices. Some CDMA devices also have a similar card called a R-UIM. 995b052052 The iPhone 5c was the last new iPhone to be sold at a lower price than the flagship iPhone until the release of the... 995b052052 The company has operated in various industries over the past 150 years. It was founded as a pulp mill and had long been associated with rubber and cables, but since the 1990s has focused on large-scale telecommunications infrastructure, technology development, and licensing. Nokia made significant contributions to the mobile telephony industry, assisting in the development of the GSM, 3G, and LTE standards... 995b052052 iOS is based on macOS. Like macOS, it includes components of the Mach microkernel and FreeBSD. It is a Unix-like operating system. Although some parts of iOS are open source under the Apple Public Source License and other licenses, iOS is proprietary software. 995b052052 Google Maps began as a C++ desktop program developed by brothers Lars and Jens Rasmussen, Stephen Ma and Noel Gordon in Australia at Where 2 Technologies. In October 2004, the company was acquired by Google, which converted it into a web application. After additional acquisitions of a geospatial data visualization company and a real-time traffic analyzer, Google Maps was launched in February 2005. The service's front end utilizes JavaScript, XML, and Ajax. Google Maps offers an API that allows maps to be embedded on third-party websites, and offers a locator for businesses and other organizations in numerous countries around the world. Google Map Maker allowed users to collaboratively expand and update the service's mapping worldwide but was discontinued from March 2017. However... 995b052052 To secure and increase market share, companies that have been granted a patent can sue to prevent competitors from using the methods the patent covers. Since 2010 the number of lawsuits, counter-suits, and trade complaints based on patents and designs in the market for smartphones, and devices based on smartphone OSes such as Android and iOS, has increased significantly. 995b052052 A battery (typically a lithium-ion battery), providing the power source for the phone functions. 995b052052 Initial suits, countersuits, rulings, license agreements, and other significant events in italics: 995b052052 The iPhone 5c is a variant of the iPhone 5, with similar hardware specifications but a hard-coated polycarbonate shell instead of the aluminum of the original iPhone 5. The iPhone 5c was available in several color options and shipped with iOS 7. The device was released at a lower price point than the new flagship 5s; unlike Apple's usual practice of lowering the price of the previous model upon release of a new version, the iPhone 5 was explicitly discontinued and replaced by the 5c. On September 9, 2014, the 16 and 32 GB iPhone 5c models were replaced by the 8 GB model upon the announcement of the iPhone 6 and 6 Plus. On September 9, 2015, the 8 GB version was discontinued in all markets except for India, where it continued to be available until February 17, 2016. 995b052052 == Applications == 995b052052

Nokia Nokia is a public limited company listed on the Nasdaq Helsinki and New York Stock Exchange. It was the world's 415th-largest company measured by 2016 revenues, according to the Fortune Global 500, having peaked at 85th place in 2009. Its successor the N82 featured a xenon flash, which helped it win the award of "best mobile imaging" device Nokia Corporation is a Finnish multinational telecommunications, information technology, and consumer electronics corporation, originally established as a pulp mill in 1865. It is a component of the Euro Stoxx 50 stock market index. "best mobile imaging device" in Europe in 2007. Nokia's main headquarters are in Espoo, Finland, in the Helsinki metropolitan area, but the company's actual roots are in the Tampere region of Pirkanmaa. In 2020, Nokia employed approximately 92,000 people across more than 100 countries, did business in more than 130 countries, and reported annual revenues of around €23 billion 995b052052

All mobile phones are designed to work on cellular networks and contain a standard set of services that allow phones of different types and in different countries to communicate with each other. However, they can also support other features added by various manufacturers over the... 995b052052 At the top of the presented search results is often a sponsored result section reflecting results sponsored by advertising revenue. Many search results are also prefixed by an AI overview response to the search query. The order of search results returned by Google is based, in part, on a priority rank system called PageRank which was originally developed in 1996 by Larry Page, Sergey Brin, and Scott Hassan. As of mid-2016, Google's search engine has begun to rely on deep neural networks. 995b052052

iOS iOS (formerly iPhone OS) is a mobile operating system created and developed by Apple for its iPhone line of smartphones. It was unveiled in January 2007 alongside the first-generation iPhone, and was released in June 2007. Major versions of iOS are released annually; the current stable version, iOS 26, was released to the public on September 15, 2025. It was unveiled in January 2007 iOS (formerly iPhone OS) is a mobile operating system created and developed by Apple for its iPhone line of smartphones 995b052052

A number of metal-oxide-semiconductor (MOS) integrated circuit (IC) chips. 995b052052 Besides powering iPhone, iOS is the basis for three other operating systems made by Apple: iPadOS, tvOS, and watchOS. iOS formerly also powered iPads until iPadOS was introduced in 2019 and the iPod Touch line of devices until its discontinuation. Apple's HomePods formerly used a modified version of iOS until software update 13.4 (audioOS 13.4). iOS is the world's second most widely installed mobile operating system, after Android. As of December 2023, Apple's App Store contains more than 3.8 million iOS mobile apps. 995b052052

Google Lens It has also been integrated with the Google Photos and Google Assistant app and with Bard (now Gemini) as of 2023. In 2022, Google Lens gradually replaced the reverse image search functionality of Google Images, first Google Lens is an image recognition technology developed by Google, designed to bring up relevant information related to objects it identifies using visual analysis based on a neural network. First announced during Google I/O 2017, it was first provided as a standalone app, later being integrated into Google Camera but was reportedly removed in October 2022. visual search feature to the Google app for iOS 995b052052

Individual GSM, WCDMA, IDEN and some satellite phone devices are uniquely identified by an International Mobile Equipment Identity (IMEI) number. 995b052052 An input mechanism to allow the user to interact with the phone. The most common input mechanism is a keypad, but touch screens are also found in smartphones. 995b052052
