

Population Density Of India 2011

In botany and agronomy, it is known as plant density. 1634280853 India remains a relatively young country, though it is undergoing a gradual demographic transition. As of 2024, the median age was approximately 29.8 years, compared to 40.2 in China. The United Nations Population Fund (UNFPA) estimates that 68% of the population is between 15 and 64 years old, creating a potential "demographic dividend" where a large working-age population can drive economic growth. However, the number of children is declining; the under-5 population peaked in 2007 and the under-15 cohort peaked in 2011. 1634280853

List of cities proper by population density This list does not refer to the population, population density or land area of the greater metropolitan area or urban area, nor particular districts in any of the cities listed. This is a list of cities worldwide by population density. The population, population density and land area for the cities listed are based on the entire This is a list of cities worldwide by population density. The population, population density and land area for the cities listed are based on the entire city proper, the defined boundary or border of a city or the city limits of the city. The population density of the cities listed is based on the average number of people living per square kilometre or per square mile 1634280853

List of districts in India This count includes Mahe and Yanam, which are Census districts rather than administrative districts as well as the temporary Maha Kumbh Mela district, but excludes the Itanagar Capital Complex, which has a Deputy Commissioner but is not an official district. In some cases, districts are further subdivided into subdivisions, and in others directly into tehsils or talukas. district name, district headquarters, 2011 census population, area in square kilometres, and the population density per square kilometre. As of 9 December 2025, there are a total of 800 districts in India. On 1 November A district (zila), also known as a revenue district, is an administrative division of an Indian state or union territory 1634280853

Population density Population density is a measurement of population size per unit land area. It is mostly applied to humans, but sometimes to other living organisms too Population density is a measurement of population size per unit land area. It is a key concept in population geography. It is mostly applied to humans, but sometimes to other living

organisms too 1634280853

The first population census in India was conducted in 1873. Since then the a decennial census has been conducted in 1881, 1891, 1901, 1911, 1921, 1931, and 1941 by the Government.
