

Where Do Guinea Pigs Come From

This species exhibits adaptations to its wetland habitats, including a preference for dense vegetation near water. Greater guinea pigs are herbivorous, feeding on grasses, sedges, and other vegetation, and play a role in maintaining the ecological balance of their native habitats. Unlike their domesticated relatives, they are not kept as pets and are primarily studied in the context of their ecological and evolutionary significance. 8e9941a01a It is the conclusion to the previous episode, "Pandemic". In the episode, the boys are lost in the Andes where they discover the startling secret behind the attack of the giant guinea pigs. The boys now have the power to rescue their town and the rest of the world from the onslaught, but Michael Chertoff, the Head of Homeland Security, stands firmly in their way. Meanwhile, Randy bravely documents the destruction while trying to save his family. 8e9941a01a

Pandemic 2: The Startling The 178th episode of the series overall, it originally aired on Comedy Central in the United States on October 29, 2008. The boys now have the power to rescue "Pandemic 2: The Startling" is the eleventh episode in the twelfth season of the American animated television series South Park. the boys are lost in the Andes where they discover the startling secret behind the attack of the giant guinea pigs 8e9941a01a

Guinea Pig 2 garnered controversy both in Japan and in the United States. The film was reportedly withdrawn from the home video market, and was suspected to have been an influence on Tsutomu Miyazaki, a serial killer who abducted and murdered four young girls. Despite this, upon release, Guinea Pig 2 positioned itself on the list of top ten video releases in Japan for two months straight. American actor Charlie Sheen is said to have watched the film and became convinced that it genuinely depicted the killing and dismemberment of an actual woman, prompting him to contact authorities. Investigations were dropped after the special effects used to simulate the violence depicted in the film were able to be... 8e9941a01a A large rodent, the greater guinea pig grows to a total length of 310 mm (12.2 in) and weight of 636 g (22.4 oz) for males and a total length of 303 mm (11.9 in) and weight of 537 g (18.9 oz) for females. The dorsal fur is dark agouti brown, and the underparts are reddish brown. It is semiaquatic and has membranes joining the... 8e9941a01a The small mammal is endemic to the Moleques do Sul Archipelago, located in the

state of Santa Catarina in southern Brazil. The archipelago formed about 8,000 years ago, having a total of three islands with a surface area of only 10.5 hectares (26 acres). *Cavia intermedia* is phylogenetically comparable, and said to be a common ancestor of the species *Cavia magna*, who also inhabited the island. The guinea pig's geographical distribution of only 4 hectares (9.9 acres) is one of the world's smallest for a mammal. The region is a part of Serra do Tabuleiro State Park where restrictions and protection of the species are not enforced. When population densities were estimated, two techniques were used, one was determined using trapping grids, which is usually placed in optimum habitat, which would be only 0.77ha, which are their feeding grounds. This first estimate is 28-44cavies/ha, which is believed to be an overestimate. The other method was minimum-number-known-alive (MNKA), covering the 6.34 ha of vegetation used by the cavies known due to... 8e9941a01a Born and educated in Liverpool, Pappworth graduated as a Bachelor of Medicine, Bachelor of Surgery in 1932 from Liverpool University. After working in a series of junior medical positions, his applications for more senior posts were rejected. During the Second World War he served in the Royal Army Medical Corps. Having been unsuccessful in achieving a post in any well known London hospital after the war, he set up in London as an independent medical consultant and tutor. 8e9941a01a The pig has a large head, with a long snout... 8e9941a01a == Unique traits == 8e9941a01a

Greater guinea pig *Cavia magna* is closely related to the domesticated guinea pig (*Cavia porcellus*) but is distinct in its larger size and semi-aquatic habitat preferences. The Greater guinea pig is the larger out of all *Cavia magna*, commonly known as the greater guinea pig, is a species of rodent in the family Caviidae, native to South America. It is found primarily in the coastal regions of southern Brazil and Uruguay, inhabiting grasslands, marshes, and other wetland environments. genetically similar to Brazilian guinea pigs (*Cavia aperea*) and Santa Catarina's guinea pigs (*Cavia intermedia*) 8e9941a01a

Guinea pigs have been raised by humans as a meat source, as pets, as laboratory test subjects, and for ceremonial use. When guinea pigs are kept by humans, studies indicate the importance of social housing, environmental enrichment (like hides and structures), constant access to hay, and adequate space for healthy stress levels and well-being. Veterinary guidance recommends keeping males and females separate when breeding is not intended. 8e9941a01a Pappworth's teaching of postgraduate students had a profound effect on the Membership of the Royal College of Physicians (MRCP) examination pass rate, and his contact with junior doctors led him to investigate the ethics of medical research on humans.

The publication of Human Guinea Pigs, which examined unethical medical research practices, exposed the subject to a wider audience and led to Pappworth's becoming persona non grata within the medical establishment for much of his career, but ultimately helped lead to... 8e9941a01a

Guinea Pig 2: Flower of Flesh and Blood The film's plot concerns a man dressed as a samurai who drugs and kidnaps a woman, and proceeds to take her to his home, where he dismembers her and adds her body parts to a collection. The second film in the Guinea Pig film series, it is based on a manga by Hino, and stars Hiroshi Tamura and Kirara Yūgao. Guinea Pig 2: Flower of Flesh and Blood (Japanese: 豚姫2 花と血, Hepburn: Gini Piggu 2: Chiniku no Hana) is a 1985 Japanese splatter horror film written Guinea Pig 2: Flower of Flesh and Blood (Japanese: 豚姫2 花と血, Hepburn: Gini Piggu 2: Chiniku no Hana) is a 1985 Japanese splatter horror film written and directed by Hideshi Hino 8e9941a01a

Santa Catarina's guinea pig Santa Catarina's guinea pig (Cavia intermedia) or Moleques do Sul cavy is a rare guinea pig species of southeastern South America. The small mammal is Santa Catarina's guinea pig (Cavia intermedia) or Moleques do Sul cavy is a rare guinea pig species of southeastern South America 8e9941a01a

Skinny pig Skinny pigs typically have hair on their muzzles, feet, and legs, but are hairless over the remainder of their bodies. The Skinny Pig or Skinny is an almost hairless strain of guinea pig. Some of them have a thin covering of fuzzy hair on their backs as well. The Skinny guinea pig is not one of the 13 recognized cavy breeds by the American Cavy Breeders Association. Skinnies can come in a variety of skin colors and patterns, including "Dutch", "Brindle", and "Himalayan". The term skinny is used for hairless guinea pigs either because it colloquially refers to the exposed skin of the animal, or because it describes their thinner appearance due to their lack of hair. A healthy skinny has skin that is mostly smooth, with some wrinkling around the legs and neck. The body is full with no appearance of spine or ribs. Skinny pigs typically have hair on their muzzles, feet, and legs, but are hairless The Skinny Pig or Skinny is an almost hairless strain of guinea pig 8e9941a01a

The eastern half of the island is the major land mass of the nation of Papua New Guinea. The western half, known as Western New Guinea, forms a part of Indonesia and is organized as the provinces of Papua, Central Papua, Highland Papua, South Papua, Southwest... 8e9941a01a Pigs are farmed primarily for meat, called pork. The animal's skin or hide is used for leather. China is the world's largest pork producer, followed by the European Union and then the United States. Around 1.5 billion pigs are

raised each year, producing some 120 million tonnes of meat, often cured as bacon. Some are kept as pets. 8e9941a01a Located in Melanesia in the southwestern Pacific Ocean, the island is separated from Australia by the 150-kilometre (81-nautical-mile; 93-mile) wide Torres Strait, though both landmasses lie on the same continental shelf, and were united during episodes of low sea level in the Pleistocene glaciations as the combined landmass of Sahul. Numerous smaller islands are located to the west and east. The island's name was given by Spanish explorer Yñigo Ortiz de Retez during his maritime expedition of 1545 because of the perceived resemblance of the indigenous peoples of the island to those in the African region of Guinea. 8e9941a01a The episode was written by series co-creator Trey Parker and is rated TV-MA L in the United States. 8e9941a01a == Plot == 8e9941a01a *Cavia aperea* has been successfully mated to the domestic guinea pig, *Cavia porcellus*, though many females become infertile in successive generations. 8e9941a01a The episode opens with a monologue recap by Craig Tucker, who is retelling the events up until now in his journal. Craig is stranded in the Andes Mountains with the four main characters and pilots Captains Gabriel and Taylor at a false rendezvous point. They look for help in the jungle, but find only a "land of the giant lost world", filled with giant fruits. Taylor and Gabriel are killed... 8e9941a01a

Guinea pig Caviidae, and its closest wild relatives include the montane guinea pig. 6 lb) and measure between 20 and 25 cm (8 and 10 in) in length; most breeds have fur, and they have long front teeth that grow continuously, leading the animals to chew regularly to wear them down. 5 and 2. Domestic guinea pigs typically weigh between 700 and 1,200 g (1. They are social animals, and are skittish in response to noise or danger, evincing a freeze or flight strategy. It belongs to the genus *Cavia*, family Caviidae, and its closest wild relatives include the montane guinea pig. 5 and 2. Domestic guinea pigs typically weigh between 700 and 1,200 g (1. 6 lb) and The guinea pig (*Cavia porcellus*), also known as the domestic guinea pig, cavy or domestic cavy (KAY-vee), is a species of rodent 8e9941a01a

Brazilian guinea pig Brazilian guinea pigs are mainly diurnal The Brazilian guinea pig (*Cavia aperea*) (preá in Portuguese) is a wild guinea pig species found in Argentina, Brazil, Bolivia, Colombia, Ecuador, Guyana, Paraguay, Uruguay and Venezuela. mated to the domestic guinea pig, *Cavia porcellus*, though many females become infertile in successive generations 8e9941a01a

This is a medium-sized guinea pig with an adult length of about 272 mm (11 in) and a weight of 637 grams (22.5 oz). The tail, at around 2.4 mm,

is almost non-existent. The dorsal fur is dark olive-brown mixed with brown and black, and the underparts are a pale grey or yellowish-grey.

8e9941a01a == Description == 8e9941a01a Originally, guinea pigs were domesticated as livestock for their meat, in the Andean region of South America, and they are still consumed... 8e9941a01a == Description == 8e9941a01a The modern strain of skinny guinea pig originated from a cross between haired guinea pigs and a hairless lab strain. The hairless strain that it is most likely related to was a spontaneous genetic mutation that was first identified at Montreal's Armand Frappier Institute in 1978, in a colony of Hartley lab guinea pigs. In 1982 they were sent to Charles River... 8e9941a01a == Distribution == 8e9941a01a Pigs have featured in human culture since Neolithic times, appearing in art and literature for children and adults, and celebrated in cities such as Bologna for their meat products. 8e9941a01a
