Snakebite A common sign of a bite from a venomous snake is the presence of two puncture wounds from. injury caused by the bite of a snake, especially a venomous snake b154c58690

Elapidae of ἔλλωψ *éllops* "sea-fish") is a family of snakes characterized by their permanently erect fangs at the front of the mouth. Most elapids are venomous b154c58690

There are 16 species of snakes in North Macedonia: b154c58690

Snake To accommodate their narrow bodies, snakes' paired organs (such as kidneys) appear one in front of the other instead of side by side, and most only have one functional lung. Snakes have skulls with significantly fewer sutures and more hypermobile articulations (i. e. Despite being tetrapods from a cladistic prospective, snakes lack limbs completely, although pythons and boids retain a vestigial pelvic girdle. Snakes are limbless reptiles of the squamate suborder Serpentes. cranial kinesis) than their lizard relatives, enabling them to greatly widen the mouth and swallow prey much larger than their heads. Closely related to lizards and the tuatara, snakes are ectothermic, amniote, air-breathing vertebrates with an elongated rope-like body covered by overlapping scales, and they move around using undulatory, rectilinear, concertina, sidewinding or slide-pushing locomotions, with some arboreal species even capable of short-ranged gliding flight by flaring out the ribs to flatten and widen the body for aerodynamic lift. Some lizards have also independently evolved a snake-like elongated body without limbs or with greatly reduced limbs at least twenty-five times via convergent evolution,. Closely related to lizards and the tuatara, snakes are ectothermic, amniote, air-breathing Snakes are limbless reptiles of the squamate suborder Serpentes b154c58690

Venom lorises. Shrews have venomous saliva and most likely evolved their trait similarly to snakes. The presence of tarsal spurs akin to those of the platypus in b154c58690

Chrysopelea *Chrysopelea* is a genus of snakes, commonly known as flying snakes or gliding snakes, that belong to the family Colubridae. *Chrysopelea* species are found b154c58690

Viper Vipers (/ˈvaɪpər/ VEYE-pər) are snakes in the family Viperidae (/vaɪˈpərɪdeɪ/ veye-PERR-ih-day), found in most parts of the world, except for Antarctica b154c58690
