Lead vocalist and guitarist Will Hunter started his musical career playing solo acoustic sets in the Kingston area while he was a student at Queen's University. He sought out other musicians and founded the band in 2012 with original drummer and bassist Don Pineapple and Colin Simonds. Fellow Queen's students Boris Baker (bass) and Cam Wyatt (lead guitar) joined what was then known as the Will Hunter Band; other musicians also performed. The group initially performed at venues in and around Queen's University.

Neck pain can be caused by other spinal problems, and may arise from muscular tightness in both the neck and upper back, or pinching of the nerves emanating from the cervical vertebrae. 6773a49071 As of 2020, neck pain affected about 203 million people globally, with females having higher prevalence. 6773a49071 Diagnosis is predominately clinical, with assessment into the underlying pathology causing iliocostal

contact, to which radiological imaging may be used. The differential diagnosis can be extensive due to the presentation of the condition, however includes neuropathic pain, hip pathologies, pinched nerves, myofascial pain, and visceral causes. Treatment of the condition is typically by addressing the underlying cause, commonly with the use of orthosis and injection therapies, however surgical resection may be necessary if other forms of treatment fails to provide relief. 6773a49071 == Differential diagnosis == 6773a49071

Iliocostal friction syndrome presentation of the condition, however includes neuropathic pain, hip pathologies, pinched nerves, myofascial pain, and visceral causes. The condition presents as low back pain which may radiate to other surrounding areas as a result of irritated nerve, tendon, and muscle structures. Treatment of the Iliocostal friction syndrome, also known as costoiliac impingement syndrome, is a condition in which the costal margin comes in contact with the iliac crest. It may occur unilaterally due to conditions such as scoliosis, or bilaterally due to conditions such as osteoporosis and hyperkyphosis 6773a49071
