

What Does Spontaneous Mean

Spontaneous generation The doctrine of spontaneous generation was coherently synthesized by the Greek philosopher and naturalist Aristotle, who compiled and expanded the work of earlier natural philosophers and the various ancient explanations for the appearance of organisms. Spontaneous generation is a superseded scientific theory that held that living creatures could arise from non-living matter and that such processes were commonplace and regular. Though challenged in the 17th and 18th centuries by the experiments of the Italian biologists Francesco Redi and Lazzaro Spallanzani, it was not discredited until the work of the French chemist Louis Pasteur and the Irish physicist John Tyndall in the mid-19th century. It was hypothesized that certain forms, such as fleas, could arise from inanimate matter such as dust, or that maggots could arise from dead flesh. Spontaneous generation was taken as scientific fact for two millennia

Speech disfluency "Planning what to say:. Tottie, Gunnel (2016). 34 (6): 709–738. 1006/jmla. 1995. doi:10. words in spontaneous speech". 1032. Journal of Memory and Language

Among biologists, rejecting spontaneous genesis is no longer controversial. Experiments conducted by Pasteur and others were thought to have refuted the conventional notion of spontaneous generation by the mid-1800s. Since all life appears to have evolved from a single form approximately...

Improvisation Improvisation in the performing arts is a very spontaneous performance without specific or scripted preparation. literally means un-foreseen. The skills of improvisation df8124db7e

Excited utterance The statement must be spontaneously made by the person (the declarant) while still under the stress of excitement from the event or condition. " or "I think he's crazy. It is an exception to the hearsay rule. It is an unplanned reaction to a "startling event". He's shooting at us. The statement could be a description or explanation (as required for present sense impression), or an opinion or inference. affirmative assertion of the statement. Examples include: "Look out. Compared to present sense impression, excited utterance is broader in scope for permitting a longer time lapse between event and statement, and a wider range of content in the statement. An excited utterance does not have to be made at time of the An excited utterance, in the law of evidence, is a statement made by a person in response to a startling or shocking event or condition. The subject matter and content of the

statement must "relate to" the event or condition in question. We're going to crash. Spontaneity of the declarant is a key to admissibility. " The basis for this hearsay exception is the belief that a statement made under the stress is likely to be trustworthy and unlikely to be a premeditated falsehood
df8124db7e

Under the Federal Rules of Evidence, an excited utterance is a hearsay exception, and is admissible to prove the truth of the statement itself (e.g... df8124db7e
