The PUT method which can be used for resource creation or replacement is idempotent and can be used only for full updates. The edit forms used in conventional Ruby on Rails application need to create new resources by applying partial updates to a parent resource. The white-naped crane was formerly placed in the genus *Grus*, but a molecular phylogenetic study published in 2010 found that the genus, as then defined, was polyphyletic. In the resulting rearrangement to create monophyletic genera, four species: the sarus crane (*Antigone antigone*), the brolga (*Antigone rubicunda*), the sandhill crane (*Antigone canadensis*) and the white-naped crane (*Antigone vipio*), were placed in the resurrected genus *Antigone* that had originally been erected by German naturalist Ludwig Reichenbach in 1853. 396a45ee13

Typically, a patch needs to be applied to the specific version of the resource it is intended to modify, although there are exceptions. Some patching tools can detect the version of the existing resource and apply the appropriate patch, even if it supports multiple versions. As more patches are released, their cumulative size can grow significantly, sometimes exceeding the size of the resource itself. To manage this, the number of supported versions may be limited, or a complete copy of the resource might be provided instead. 396a45ee13

The main difference between the PUT and PATCH method is that the PUT method supplies In computing, the PATCH method is a request method in HTTP for making partial changes to an existing resource. The changes described in the PATCH document must be semantically well defined but can have a different media type than the resource being patched. methods such as PUT, POST and PATCH to create or update resources. If the requested resource does not exist then the server may create the resource depending on the PATCH document media type and permissions. The

PATCH method provides an entity containing a list of changes to be applied to the resource requested using the HTTP Uniform Resource Identifier (URI). Languages such as XML or JSON can be used in describing the changes in the PATCH document 396a45ee13

The most obvious differences between Spanish and Portuguese are in pronunciation. Mutual intelligibility is greater when written rather than spoken. Compare, for example, the following sentences—roughly equivalent to the English proverb "A word to the wise is sufficient," or, a more literal translation, "To a good listener, a few words are enough.": 396a45ee13 In his time on Coronation Street, Frank survived the death of Ida in 1961 and entered into a controversial relationship with younger woman Christine Appleby (Christine Hargreaves). He remained in a prominent role until May 1964, when the character was written out by series producer Tim Aspinall. Pemberton later reprised the role for two further episodes, in 1967 and 1971. Frank last appeared at the funeral of daughter-in-law Valerie Barlow (Anne Reid).
