

Black Or Green Stool

Ampulla of Vater The common duct then opens medially into the descending part of the duodenum at the major duodenal papilla. It was first The ampulla of Vater, hepatopancreatic ampulla or hepatopancreatic duct is the common duct that is usually formed by a union of the common bile duct and the pancreatic duct within the wall of the duodenum. The silver-colored stool is a combination of the white stool of obstructive jaundice combined with black stool of melena or bleeding. This common duct usually features a dilation ("ampulla"). treatment. The common duct usually measures 2–10mm in length 30b055df43

Iris aphylla is slightly shorter than Iris germanica (a commonly cultivated garden iris), but which it is very closely related. 30b055df43 In infants, the Apt test, a test that is particularly useful in cases where a newborn has blood in stool or vomit, can be used to distinguish fetal hemoglobin from maternal blood based on the differences in composition of fetal hemoglobin as compared to the hemoglobin found in adults. A non-harmful cause of neonatal bleeding include swallowed maternal... 30b055df43

Close stool Close stools were used from the Middle Ages (the Oxford English Dictionary gives the first citation as 1410) until the introduction of the indoor flush toilet. decoration. Close stools belonging to Cardinal Wolsey were covered with scarlet cloth and black velvet. "Stool" has two relevant meanings: as a type of seat and as human feces. Green made a leather carrying case for the stool. A close stool was an early type of portable toilet, made in the shape of a cabinet or box at sitting height with an opening in the top. The external structure contained a pewter or earthenware chamberpot to receive the user's excrement and urine when they sat on it; this was normally covered (closed) by a folding lid 30b055df43

Jacob was born into slavery with 113 other slaves on a plantation in Queen Ann's County, Maryland, with only his mother as family. Judge Charles Earle put Jacob to work at age eight running chores and giving water to the other slaves. When Jacob was twelve, his mother was sold to a trader, and all he said about his mother was that she was a good slave. Similar to Mr. Cobb's saying, she said if you did what you're told and stay out of trouble your master would treat you well. Five years later he caught a white boy stealing from him and when they got into a fight, a man by the name of Mr. Burmey came in and broke up the fight beating Jacob and threatening to cut off his hands for hitting a white boy. This triggered a deep hatred within Jacob and when he finally got the chance, he managed to replace Mr. Burmey's smoking tobacco with gunpowder. No one ever suspected him of the deed, and he got his satisfying revenge. 30b055df43

Ashanti flag It depicts the Golden Stool (Ashanti: Sika' dwa), the throne of the Asantehene. depicts the Golden Stool (Ashanti: Sika' dwa), the throne of the Asantehene. In the early 1950s, the Ashanti flag was green, gold and black, with a cocoa pod The Ashanti flag is the flag of the Ashanti people 30b055df43

== Flag of St. Lucia == 30b055df43 In the early 1950s, the Ashanti flag was green, gold and black, with a cocoa pod and a porcupine on it. In 1956, the National Liberation Movement proposed a yellow flag with a black, white and green tricolour canton as the flag of an autonomous Ashanti kingdom. 30b055df43

Lower gastrointestinal bleeding The stool of a person with a lower gastrointestinal bleed is a good (but not infallible) indication of where the bleeding is occurring. It is estimated that UGIB accounts for 100–200 per 100,000 cases versus 20–27 per 100,000 cases for LGIB. LGIB is a common reason for seeking medical attention at a hospital's emergency department. Black tarry Lower gastrointestinal bleeding (LGIB) is any form of gastrointestinal bleeding in the lower gastrointestinal tract. Approximately 85% of lower gastrointestinal bleeding involves the large intestine, 10% are from bleeds that are actually upper gastrointestinal bleeds, and 3–5% involve the small intestine. LGIB accounts for 30–40% of all gastrointestinal bleeding and is less common than upper gastrointestinal bleeding (UGIB) 30b055df43

Human feces It also contains bacteria and a relatively small amount of metabolic waste products such as bacterially altered bilirubin, and the dead epithelial cells from the lining of the gut. It is discharged through the anus during a process called defecation. English) or faeces (British English), commonly and in medical literature more often called stool, commonly referred to as poo or poop, are the solid or semisolid Human feces (American English) or faeces (British English), commonly and in medical literature more often called stool, commonly referred to as poo or poop, are the solid or semisolid remains of food that could not be digested or absorbed in the small intestine of humans, but has been further broken down by bacteria in the large intestine 30b055df43

Human feces together with human urine are collectively called human waste... 30b055df43 == Plot and themes == 30b055df43 Human feces have similarities to the feces of other animals and varies significantly in appearance (i.e. size, color, texture), according to the state of the diet, digestive system, and general health. Normally, human feces are semisolid, with a mucus coating. Small pieces of harder, less moist feces can sometimes be seen impacted in the distal (final or lower) end. This is a normal occurrence when a prior bowel movement is incomplete, and feces are returned from the rectum to the large intestine, where water is further absorbed. 30b055df43 == History == 30b055df43

Jacob D. Green Green (August 24, 1813 – unknown) was an African-American writer and lecturer. care. He took a rope and pretended to string himself up, standing on a stool. He tried many ways to convince her he was dying but she took no interest Jacob D. Born into slavery in Maryland, he wrote a slave narrative after escaping from his enslaver in 1848 30b055df43

It is a variable species in the wild, especially in flower colour, height of stem and leaves, and length of perianth tube (of the flower). 30b055df43 The ampulla of Vater is an important landmark halfway along the second part of the duodenum marking the transition from foregut to midgut. 30b055df43 == At the Tudor Court == 30b055df43

Iris aphylla Iris aphylla (also known as leafless iris, table iris or stool iris) is a species in the genus Iris, it is also in the subgenus Iris, and in the section Iris aphylla (also known as leafless iris, table iris or stool iris) is a species in the genus Iris, it is also in the subgenus Iris, and in the section Iris. It also has a slender stem, with several branches and green and purplish spathes. It is a rhizomatous

perennial, from Asia to Europe. It is found in Azerbaijan, Russian Federation, Czech Republic, Germany, Hungary, Poland, Belarus, Ukraine, Bulgaria, Albania, Former Yugoslavia, Italy, Romania and France. It has 3-5 large flowers, in shades of bright purple, purple, violet, dark blue, blue-violet and dark violet, which bloom between spring and early summer. It has dark green or bright green, sword-shaped, long grass-like leaves, that die/fade away in the winter. It is cultivated as an ornamental plant in temperate regions. Occasionally, they re-bloom in the autumn, before the seed capsule is formed 30b055df43

== Description == 30b055df43 == Structure == 30b055df43 == Childhood == 30b055df43 The plot of the masque follows the ladies arriving at the royal court to be "cleansed" of their blackness by King James; a stage direction that was impossible to fulfill on stage. They had been instructed by a riddle to seek the land "Britannia". The theme of the masque was a commentary on political union and the disparate identities of the peoples of Britain. The Masque of Beauty was written as a sequel to The Masque of Blackness, and originally intended for the following holiday season. It was displaced by Hymenaei, the masque for the wedding of the Earl of Essex and Frances... 30b055df43

The Masque of Blackness technicians who operated them. In a ceremony earlier on the day, Prince Charles, Anne's second son (who was still in Scotland at Dunfermline Palace) was given the title of Duke of York. Anne was one of the performers in the masque along with her court ladies, all of whom appeared in blackface makeup. Blackness introduced effects that Jones would repeat with variation The Masque of Blackness was an early Jacobean era masque, first performed at the Stuart Court in the Banqueting Hall of Whitehall Palace on Twelfth Night, 6 January 1605. The King was often sitting on a stool, resembling the sun. It was written by Ben Jonson at the request of Anne of Denmark, the queen consort of King James I, who wished the masquers to be disguised as Black Africans 30b055df43

Blood in stool Evaluation of the blood found in stool depends on its characteristics, in terms of color, quantity and other features, which can point to its source, but more serious conditions can present with a mixed picture, or with the form of bleeding that is found in another section of the tract. The term can refer either to melena, with a black appearance, typically originating from upper gastrointestinal bleeding; or to hematochezia, with a red color, typically originating from lower gastrointestinal bleeding. Blood in stool looks different depending on how early it enters the digestive tract—and thus how much digestive action it has been exposed to—and how Blood in stool looks different depending on how early it enters the digestive tract—and thus how much digestive action it has been exposed to—and how much there is. The term "blood in stool" is usually only used to describe visible blood, and not fecal occult blood, which is found only after physical examination and chemical laboratory testing 30b055df43

It has short, tuberous rhizome, that is 18-22 mm... 30b055df43 A lower gastrointestinal bleed is defined as bleeding originating distal to the ileocecal valve, which includes the colon, rectum, and anus. LGIB was previously defined as any bleed that occurs distal to the ligament of Treitz, which included the aforementioned parts of the intestine and also included the last 1/4 of the duodenum and the entire area of the jejunum and ileum. This has been divided into middle gastrointestinal bleeding (from the ligament of Treitz to the ileocecal valve) and lower gastrointestinal bleeding which involves a bleed... 30b055df43

National symbols of Saint Lucia Sydney Bagshaw in 1967. The shield is supported by two Saint Lucian The national symbols of Saint Lucia are the symbols that this Caribbean nation identifies with. The coat of arms is made of a blue shield with a stool, two roses and two fleur de lis. The most recognizable national symbols of Saint Lucia are the flag and the coat of arms 30b055df43
