The earliest compositions date from around 1960, the time of his study under John Gardner at Chico State in English 20A: Creative Writing. Bed bug bites are caused primarily by two species of insects: *Cimex lectularius* (the common bed bug) and *Cimex hemipterus*, found primarily in the tropics. Their size ranges between 1 and 7 mm. They spread by crawling between nearby locations or by being carried within personal items. Infestation is rarely due to a lack of hygiene but is more common in high-density areas. Diagnosis involves both finding the bugs and the occurrence of compatible symptoms. Bed bugs spend much of their time in dark, hidden locations like mattress seams, or cracks in a wall. == Plot == Plot == Plot == Don't Look Under the Bed was controversial during its production, as Disney was hesitant to include an interracial kiss in the film's climax.
