Skin (2019 film) Skin is a Netflix documentary produced by British-Nigerian actress Beverly Naya to explore the gap between fair skinned ladies and dark skinned in Africa Skin is a Netflix documentary produced by British-Nigerian actress Beverly Naya to explore the gap between fair skinned ladies and dark skinned in Africa. Colorism, unlike racism means discrimination of people based on skin

shades and is prevalent among people of the same ethnic or racial group. The documentary was set up in Lagos to learn about contrasting perceptions of beauty from individuals who have gone through discrimination due to color of their skins 52f6d1ad94

So many professionals were interviewed in this documentary ranging from doctors to celebrities and photographers. A contrasting moment is the meeting with Bobrisky. 52f6d1ad94 Humans with light skin pigmentation have skin with low amounts of eumelanin, and possess fewer melanosomes than humans with dark skin pigmentation. Light skin provides better absorption qualities of ultraviolet radiation, which helps the body to synthesize higher amounts of vitamin D for bodily processes such as calcium development. On the other hand, light-skinned people who live near the equator, where there is abundant sunlight, are at an increased risk of folate... 52f6d1ad94

Human skin color Human skin color, also known as skin tone, ranges from the darkest brown to the lightest hues. Differences across populations evolved through natural selection and sexual selection, because of social norms and differences in environment, as well as regulation of

the biochemical effects of ultraviolet radiation penetrating the skin. Differences in skin color among individuals is caused by variation in pigmentation, which is largely due to genetics (inherited from one's biological parents), and, in adults in particular, to exposure to the sun, disorders, or some combination thereof. Differences in skin color among individuals is caused by Human skin color, also known as skin tone, ranges from the darkest brown to the lightest hues 52f6d1ad94

Human skin Human skin is similar to most of the other mammals' skin, and it is very similar to pig skin. The skin has up to seven layers of ectodermal tissue guarding muscles, bones, ligaments and internal organs. Though nearly all human skin is covered with hair follicles, it can appear hairless. There are two general types of skin: hairy and glabrous skin (hairless). internal organs. The adjective cutaneous literally means "of the skin" (from Latin cutis, skin). Human skin is similar to most of the other mammals' skin, and it is very similar to pig skin. Though nearly all human skin is covered with hair The human skin is the outer covering of the body and is the largest organ of the integumentary system 52f6d1ad94

Due to migrations of people in recent centuries, light-skinned populations today are found all over the world. Light skin is most commonly found amongst the native

populations of Europe, East Asia, West Asia, Central Asia, Indian subcontinent, Siberia, and North Africa as measured through skin reflectance. People with light skin pigmentation are often referred to as "white", but the majority of countries officially categorize people by ethnic or national origin and not by perceived skin tone. Furthermore, definitions and perceptions of "ethnicity" or "race" vary greatly from country to country.

Skin plays an important immunity role in protecting the body against pathogens and excessive water loss. Its other functions are insulation, temperature regulation, sensation, synthesis of vitamin D, and the protection of vitamin B folates. Severely damaged skin will try to heal by forming scar tissue. This is often discoloured and depigmented.

== Synopsis ==

Human skin color is influenced greatly by the amount of the pigment melanin present. Melanin is produced within the skin in cells called melanocytes; it is the main determinant of the skin color of darker-skin humans. The skin color of people with light skin is determined mainly by the bluish-white connective tissue under the dermis and by the hemoglobin circulating in the veins of the dermis. The red color underlying the skin becomes more visible, especially in the face, when, as a consequence of physical exercise, sexual arousal, or the stimulation of the nervous system (e.g. due to anger or embarrassment...

Glow & Lovely Glow Glow & Lovely (formerly Fair & Lovely) is an Indian skin-lightening cosmetic product of

Hindustan Unilever introduced to the market in India in 1975.
