It may also be adopted when no feasible alternative strategy can be devised. Employment of this strategy implies that the side adopting this strategy believes time is on its side, usually because the side employing the strategy is fighting in, or close to, their homeland and the enemy is far from home and by necessity has long and costly supply lines. While avoiding decisive battles, the side employing this strategy harasses its enemy through skirmishes to cause attrition, disrupt supply and affect morale f3945ece10

The term strategy is typically used to mean a complete algorithm for playing a game, telling a player what to do for every possible situation. A player's strategy determines the action the player will take at any stage of the game. However, the idea of a strategy is often confused or conflated with that of a move or action, because of the correspondence between moves and pure strategies in most games: for any move X, "always play move X" is an example of a valid strategy, and as a result every move can also be considered to be a strategy. Other authors treat strategies as being a different type of thing from actions, and therefore distinct. f3945ece10 Other generations of technology-related strategies primarily focus on: the efficiency of the company's spending on technology; how people, for example the organization's customers and employees, exploit technologies in ways that create value for the organization; on the full integration of technology-related decisions with the company's strategies and operating plans, such that no separate technology strategy exists other than the de facto strategic principle that

the organization does not need or have a discrete 'technology strategy'. f3945ece10 == Types of trading strategies == f3945ece10

Strategy (game theory) or battleship. Some examples of "games" include chess, bridge, poker, monopoly, diplomacy or battleship. The discipline mainly concerns the action of a player in a game affecting the behavior or actions of other players. The term strategy is typically used to mean a complete algorithm for playing a game, telling a player what to do for every possible situation In game theory, a move, action, or play is any one of the options which a player can choose in a setting where the optimal outcome depends not only on their own actions but also on the actions of others f3945ece10

Strategy video games are commonly divided into two main forms: turn-based strategy (TBS), in which players act in discrete turns, and real-time strategy (RTS), in which gameplay proceeds continuously. Many also incorporate elements such as tactics, diplomacy, economics, or exploration. f3945ece10 In contrast to strategy, grand strategy encompasses more than military means (such as diplomatic and economic means); does not equate success with purely military victory but also the pursuit of peacetime goals and prosperity; and considers goals and interests in the long-term rather than short-term. f3945ece10 For every trading strategy one needs to define assets to trade, entry/exit points and money management rules. Bad money management can make a potentially profitable strategy unprofitable. f3945ece10 In contrast to foreign policy, grand strategy emphasizes the military implications of policy; considers costs benefits of policies, as well as limits on capabilities; establishes priorities; and sets out a practical plan rather than a set of ambitions and wishes. A country's political leadership typically directs grand strategy with input from the most senior military officials. Development of a nation's grand strategy may extend across many years or even multiple generations. f3945ece10 == Rome versus Carthage: The Second Punic War == f3945ece10

A player must plan a series of actions against one or more opponents, and the reduction of enemy forces is usually a goal. Victory is achieved through superior planning, and the element of chance takes a smaller role. In most strategy video games, the player is given a godlike view of the game world, and indirectly controls game units under their command. Thus, most strategy games involve elements of warfare to varying degrees... f3945ece10

Strategy In the sense of the "art of the general", which included several subsets of skills including military tactics, siegecraft, logistics etc. , the term came into use in the 6th century C. in Eastern Roman terminology, and was translated into Western vernacular languages only in the 18th century. Strategy (from Greek στρατηγία stratēgia, "troop leadership; office of general, command, generalship") is a general plan to achieve one or more long-term Strategy (from

Greek στρατηγία *stratēgia*, "troop leadership; office of general, command, generalship") is a general plan to achieve one or more long-term or overall goals under conditions of uncertainty. From then until the 20th century, the word "strategy" came to denote "a comprehensive way to try to pursue political ends, including the threat or actual use of force, in a dialectic of wills" in a military conflict, in which both adversaries interact. Going short trading would mean to research and pick stocks for future fast trading activity on one's accounts with a rather speculative attitude. Low turnover, principles of time-tested investment approaches, returns with risk-adjusted actions, and diversification are the key features of investing in a long-term manner. f3945ece10 Trading strategies are based on fundamental or technical analysis, or both. They are usually verified by backtesting, where the process should follow the scientific method, and by forward testing (a.k.a. 'paper trading') where

they are tested in a simulated trading environment. f3945ece10 Strategy is important because the resources available to achieve goals are usually limited. Strategy generally involves setting goals and priorities, determining the actions needed to achieve the goals, and mobilizing resources to execute those actions. A strategy describes how the ends (goals) will be achieved by the means (resources). Strategy can be intended or can emerge as a pattern of activity as the organization adapts to its environment... f3945ece10
