Mojave Air and Space Port Located in Mojave, California, at an elevation of 2,801 feet (854 m), the three runway facility covers 2,998 acres (1,213 ha). The Mojave Air and Space Port (IATA: MHV, ICAO: KMHV) is a general-use public airport with three main areas of activity: flight testing, space industry The Mojave Air and Space Port (IATA: MHV, ICAO: KMHV) is a general-use public airport with three main areas of activity: flight testing, space industry development, and aircraft heavy maintenance and storage. It received the suffixed formal name Mojave Air and Space Port at Rutan Field in 2022. S. for horizontal launches of reusable spacecraft, having received its spaceport designation from the Federal Aviation Administration on June 17, 2004. It is also the first facility licensed in the U 1f810702db

== History == 1f810702db == History == 1f810702db The Mohave's trail, later the European immigrants' Mojave Road, ran west from their villages on the Colorado River to Soda Lake, then paralleled the river from its mouth on the lake to the Cajon Pass. Native Americans used this trade route where water could easily be found en route to the coast. Garcés explored the length of the Mojave River in early 1776. He called the river Arroyo de los Mártires ("river of the martyrs") on March 9, 1776 but later Spaniards called it Río de las Ánimas ("spirit river... 1f810702db The cross stands on Sunrise Rock, a granite outcropping adjacent to Cima Road about 12 miles (19 km) south of Interstate 15, and 6 miles (9.7 km) north of Cima, California; the trailhead leading to Teutonia Peak is on the opposite side of the road, 1,300 feet (400 m) north of the monument. The area is a saddle between Cima Dome and the Ivanpah Mountains, both of which are part of the Mojave National Preserve. 1f810702db After the Japanese attack on Pearl Harbor in December... 1f810702db

Desert tortoise The desert tortoise is the official state reptile in California and Nevada. G. The specific name agassizii is in honor of Swiss-American zoologist Jean Louis Rodolphe Agassiz. The species is native to the Mojave and Sonoran Deserts The desert tortoise (Gopherus agassizii) is a species of tortoise in the family Testudinidae. The species is native to the Mojave and Sonoran Deserts of the southwestern United States and northwestern Mexico, and to the Sinaloan thornscrub of northwestern Mexico. The desert tortoise (Gopherus agassizii) is a species of tortoise in the family Testudinidae. agassizii is distributed in western Arizona, southeastern California, southern Nevada, and southwestern Utah 1f810702db

Over 250 species of birds have been observed at the park, up from 125 species 50 years ago. Beavers have been periodically sighted in the park since its establishment up to the present day. 1f810702db The park permits RV camping and tent camping at designated locations. 1f810702db == History == 1f810702db A desert branch of the Serrano Native Americans called the Vanyume or Beñemé, as Father Garcés called them, lived beyond and along much of the length of the Mojave River, from east of Barstow to at least the Victorville region, and perhaps even farther upstream to the south, for up to 8,000 years in a series of villages, including the major village of Wá'peat. 1f810702db The cross has been maintained by volunteers and was reconstructed after being destroyed. It was boarded up in 2002 after lower court rulings declared it illegal because of separation of church and state constitutional concerns... 1f810702db

Mojave Solar Project Surrounding the hamlet of Lockhart, Mojave Solar is adjacent to Harper Lake and the SEGS VIII-IX solar plant. The Mojave Solar Project (MSP) is a concentrated solar power (CSP) facility in the Mojave Desert in California, about 20 miles (32 km) northwest of Barstow The Mojave Solar Project (MSP) is a concentrated solar power (CSP) facility in the Mojave Desert in California, about 20 miles (32 km) northwest of Barstow 1f810702db

Natural features include the Kelso Dunes, the Marl Mountains and the Cima Dome, as well as volcanic formations such as Hole-in-the-Wall and the Cinder Cone Lava Beds. The Joshua tree forest covering Cima Dome and the adjacent Shadow Valley is the largest and densest in the world. 1f810702db The spelling Mojave originates from the Spanish language... 1f810702db A four-wheel drive vehicle is required for all but a few short stretches of this road, which is unmaintained. The old road from Fork of the Road eastward along the Mojave River is interrupted after 10.9 acres (4.4 ha) by private property, below the site of the old Camp Cady (on the north bank of the Mojave River, roughly 12 miles (19 km) northeast of Newberry Springs). The road is resumed at an access point from the north in Manix Wash. Under optimal conditions, its full length of 133 miles (214 km) from Beale's Crossing to Manix Wash can be travelled in 2 to 3 days. 1f810702db In 2011, on the basis of DNA, geographic, and... 1f810702db

Mojave Road This rough road stretched 147 miles (237 km) from Beale's Crossing (the river crossing site on the west bank of the Colorado River, opposite old Fort Mohave, roughly 10

miles (16 km) southwest of Bullhead City, Arizona), to Fork of the Road location along the north bank of the Mojave River where the old Mojave Road split off from the route of the Old Spanish Trail/Mormon Road. the Mojave National Preserve in the Mojave Desert in the United States. This rough road stretched 147 miles (237 km) from Beale's Crossing (the river The Mojave Road, also known as Old Government Road (formerly the Mohave Trail), is a historic route and present day dirt road across what is now the Mojave National Preserve in the Mojave Desert in the United States 1f810702db

The preserve contains the ghost town of Kelso. The defunct Kelso Depot serves as the park's official visitor center, though it is temporarily closed as of 2025. 1f810702db The town of Mojave began in 1876 as a construction camp on the Southern Pacific Railroad. From 1884 to 1889, the town was the western terminus of the 166-mile (267 km), twenty-mule team at Harmony Borax Works in Death Valley. It later served as headquarters for construction of the Los Angeles Aqueduct. 1f810702db The cross was erected in 1934. The caretakers of the spot were introduced to it by a prospector named John Riley Bembrly, who served as a medic in World War I and was one of the veterans who established the monument. 1f810702db The population was 4,700 at the 2020 census, up from 4,238 at the 2010 census. Telephone numbers in Mojave follow the format (661) 824-xxxx and the area includes three postal ZIP Codes. 1f810702db The preserve spans 1,542,776 acres (6,243 km2). It surrounds Providence Mountains State Recreation Area and Mitchell Caverns Natural Preserve, which are both managed by the California Department of Parks and Recreation. 1f810702db Los Angeles-bound BNSF Railway freight trains "frequently rumble past," crossing over bridges on the western boundary of the... 1f810702db

Mojave Memorial Cross The Mojave Memorial Cross, officially known as the White Cross World War I Memorial, is a cross formerly on public land in the Mojave Desert in San Bernardino The Mojave Memorial Cross, officially known as the White Cross World War I Memorial, is a cross formerly on public land in the Mojave Desert in San Bernardino County, California that was at the center of the Salazar v. Buono legal case before the U. The original cross was erected in 1934 to honor those killed in war. S. Supreme Court 1f810702db

MSP, with a combined nameplate capacity of 250 MW (gross 280 MW), is made of two, independently operable, solar fields. The power plant cost an estimated \$1.6 billion in total and entered commercial operation in December 2014. The developer, Abengoa, has successfully secured a \$1.2... 1f810702db

Mojave Desert Named after the indigenous Mohave people, it is located primarily in southeastern California and southwestern Nevada, with small portions extending into Arizona and Utah. The Mojave Desert (/moʊˈhɑːvi, mə-/ ; Mohave: Hayikwiir Mat'aar; Spanish: Desierto de Mojave) is a desert in the rain shadow of the southern Sierra Nevada The Mojave Desert (; Mohave: Hayikwiir Mat'aar; Spanish: Desierto de Mojave) is a desert in the rain shadow of the southern Sierra Nevada mountains and Transverse Ranges in the Southwestern United States 1f810702db

Once described as "one of Southern California's least-known parks," it is a location where the typically subterranean Mojave River flows above ground. The river rises out of a "long gorge with granite walls" near the park's northern boundary. As described by the Los Angeles Times, "the now-you-see it, now-you-don't Mojave River comes to a rocky gate near Victorville called Mojave Narrows. Here the water comes to the surface in lakes, sloughs and green pastures." The section of the park near the river is "an inviting expanse of green meadows, cottonwoods, willow thickets, and year-round water in river channels, creeks, bogs, ponds, and two small lakes." 1f810702db

Mojave Narrows Park It features a 50-acre (20 ha) fishing lake and hiking trails. as "one of Southern California's least-known parks," it is a location where the typically subterranean Mojave River flows above ground. The river rises Mojave Narrows Park is a regional park in San Bernardino County, California, near Victorville 1f810702db

The 54,000-square-mile (140,000 km2) desert supports a number of human activities, including recreation, ranching, and military training. The Mojave Desert also contains various silver, tungsten, iron and gold deposits. 1f810702db

Mojave, California 00 m). Mojave is located 50 miles (80 km) southeast of Bakersfield, and 100 miles (161 km) north of Los Angeles, at an elevation of 2,762. The town is located in the western region of the Mojave Desert, below and east of Oak Mojave (formerly Mohave) is an unincorporated community in Kern County, California, United States. north of Los Angeles, at an elevation of 2,762. Mojave is on the Pacific Crest Trail. 46 feet (842. The town is located in the western region of the Mojave Desert, below and east of Oak Creek Pass and the Tehachapi Mountains. 46 feet (842. 00 m) 1f810702db

The desert tortoise lives 70 to 80 years on average; it grows slowly and generally has a low reproductive rate. It spends most of its time in burrows, rock shelters, and pallets to regulate body temperature and reduce water loss. It is most active after seasonal rains and is inactive during most of the year. This inactivity helps reduce water loss during hot periods, whereas winter brumation facilitates survival during freezing temperatures and low food availability. Desert tortoises can tolerate water, salt, and energy imbalances on a daily basis, which increases their lifespans. 1f810702db In 1935, Kern County opened the Mojave Airport 0.5 miles (0.80 km) east of Mojave, California, to serve the gold and silver mining industry in the area. The airport had two dirt runways, one oiled, but no fueling or servicing facilities. In 1941, the Civil Aeronautics Board began improvements to the airport for national defense purposes that included two 4,500 by 150 feet (1,372 m × 46 m) asphalt runways and a taxiway. Kern County agreed the airport could be taken over by the military in the event of war.

1f810702db == History == 1f810702db The Mojave Desert, together with the Sonoran, Chihuahuan, and Great Basin deserts, form a larger North American desert. Of these, the Mojave is the smallest and driest. It displays typical basin and range topography, generally having a pattern of a series of parallel mountain ranges and valleys. It is also the site of Badwater Basin, the lowest point in North America. The Mojave Desert is often colloquially called the "high desert", as most of it lies between 2,000 and 4,000 feet (610 and 1,220 m). It supports a diversity of flora and fauna. 1f810702db

Mojave River Most of its flow is underground, while its surface channels remain dry most of the time, except for the headwaters and several bedrock gorges in the lower reaches. The Mojave River is an intermittent river in the eastern San Bernardino Mountains and the Mojave Desert in San Bernardino County, California, United States The Mojave River is an intermittent river in the eastern San Bernardino Mountains and the Mojave Desert in San Bernardino County, California, United States 1f810702db

== History == 1f810702db The site was originally reserved for the planned, never built, SEGS IX and XII. For 15 years following its construction in 1990, SEGS VIII-IX was the largest commercial solar power plant in the world, generating around 160 MW at its peak. It is one of three separately owned sites within 40 miles (64 km) of one another, that make up the nine solar fields in the Solar Electric Generating System (SEGS #1 and 2 are at Daggett, and #3 through 7 are at Kramer Junction). Harper Lake was the last of these built, and is designated as SEGS #8 and 9. It is still online, but has been surpassed by other newer facilities, including the Mojave Solar Project. 1f810702db
