Pre-Code Hollywood Before that date, film content was restricted more by local laws, negotiations between the Studio Relations Committee (SRC) and the major studios, and popular opinion than by strict adherence to the Hays Code, which was often ignored by Hollywood filmmakers. Each MASH unit had 60 beds, as well as surgical, nursing, and other enlisted and officer staff available at all times. MASH units filled a vital role in military medicine by providing support to army units upwards of 10,000 to 20,000 soldiers. These units had a low mortality rate compared to others, as the transportation time to hospitals was shorter, resulting in fewer patients dying within the "Golden Hour", the first hour after an injury is first sustained, which is referred to in trauma as the "most important hour". The U.S. Army deactivated the last MASH unit on February 16, 2006. 1bd038f67f
