

Monocytes Meaning In Hindi

Visceral leishmaniasis Visceral leishmaniasis (VL), also known as kala-azar (Hindi: काला अज़र, "black sickness" or "black fever", is the most severe form of leishmaniasis Visceral leishmaniasis (VL), also known as kala-azar (Hindi: काला अज़र, "black sickness") or "black fever", is the most severe form of leishmaniasis and, without proper diagnosis and treatment, is associated with high fatality. Leishmaniasis is a disease caused by protozoan parasites of the genus Leishmania ec63691800

Support Could find very little to complain about at the PR. This looks to be a sound, FA quality article on the subject which meets the critieria. Only thing worth mentioning is that I wouldn't mind seeing a pin map of Dublin in the infobox showing where it was in the city. It would be of limited use I guess given that we can't see the streets when it's small in the infobox. You can click it though to make out features and roughly where the pin marker would be. If you look at the one in Smalls Paradise for instance, I think it helps the reader.♦ Dr. Blofeld 23:18, 23 March 2016 (UTC)reply ec63691800

Leishmaniasis The cutaneous form presents with skin ulcers, while the mucocutaneous form presents with ulcers of the skin, mouth, and nose. It is generally spread through the bite of phlebotomine sandflies, Phlebotomus and Lutzomyia, and occurs most frequently in the tropics and sub-tropics of Africa, Asia, the Americas, and southern Europe. and spleen monocytes or, less commonly, in circulating neutrophils and in aspirated tissue macrophages. The visceral form starts with skin ulcers and later presents with fever, low red blood cell count, and enlarged spleen and liver. They are small, round bodies 2–4 μm in diameter Leishmaniasis is a wide array of clinical manifestations caused by protozoal parasites of the Trypanosomatida genus Leishmania. The disease can present in three main ways: cutaneous, mucocutaneous, or visceral ec63691800

Support. I also had my say at the PR, where my minor points were addressed. This is an excellent overview of a monument that is fading from memory. It fits the FA criteria in my opinion. - SchroCat (talk) 08:41, 24 March 2016 (UTC)reply ec63691800 When people develop visceral leishmaniasis, the most typical symptoms are fever... ec63691800 Edit one section at a time due to length of this page. Picking a section at random might avoid conflicts with other editors. ec63691800 Nominator(s): Brianboulton (talk) 22:00, 23 March 2016 (UTC) and Carcharoth (talk)reply ec63691800

Not sure how an IP from the UK got interested in a Bollywood actress but thanks The following is an archived discussion of a featured article nomination. It was a top grossing film in the Hindi film industry not worldwide. films" ec63691800

I will email the library on Tuesday - not much point contacting them before then. Brianboulton (talk) 18:44, 26 March 2016 (UTC)reply ec63691800 I took a look at this before the nomination. The Library "is not aware of any current copyright restrictions on the photographs, usually because the Library owns the copyright or the term of copyright has expired". Based on the age of the image, one would think the library had purchased the copyright. However, it would perhaps be best to confirm with them. — Chris Woodrich (talk) 07:25, 26 March 2016 (UTC)reply ec63691800 Nelson's Pillar, erected in 1809 to honour the British hero of Trafalgar, was a feature of Dublin for more than 150 years until, suddenly, it wasn't. Before its sudden demise it was both loved and resented by Dubliners, and survived numerous schemes for its removal or replacement with something specifically Irish. A mixture of bureacracy, sentiment – and the sense that there were more urgent priorities – kept the "one-handed adulterer" on his pedestal for far longer than perhaps even he would have expected. Opinion is divided as to whether his eventual replacement in the city centre, the Spire of Dublin, is a worthy successor. After a pretty thorough peer review and some excellent suggestions for improvements, we feel it is ready for FAC. Further comments and criticisms are welcome. Brianboulton (talk) 22:00, 23 March 2016 (UTC)reply ec63691800 Thanks for your support. I have no objection to adding the location map, but you will have to tell me how to add the pin, which in this case should go where the "n" of "Dublin" is now placed in the map. Brianboulton (talk) 11:50, 26 March 2016 (UTC)reply ec63691800

Wikipedia:Typo Team/moss/D wikt:ivyane) 1 Dendritic cell - wikt:moDCs – an abbreviation of monocyte-derived dendritic cells as in [1] —PrinceTortoise (he/him • poke • inspect) 21:17, 23 - == Quick start == ec63691800

We have been through this t... ec63691800 Correctly spelled English words can be added to Wiktionary by following the wikt: link, or just left on the list here with a note, to be collected by other editors who enjoy dictionaries. ec63691800 Delete the entry from the list if you corrected... ec63691800 Fix the misspelling if you're sure you know the correct spelling, and save the article. Don't change compound words (like buckwheat -> buck wheat) unless you know they are wrong (like Whitehouse -> White House for the U.S. president). ec63691800 The article was promoted by Laser brain via FACBot (talk) 20:23, 30 March 2016 [1]. ec63691800 T1 sections are for the most likely misspellings; TS sections have mostly whitespace errors, but some could also be a compound word that should be added to Wiktionary. ec63691800 == Signs and symptoms == ec63691800 VL is the second-largest parasitic killer in the world (after malaria), responsible for an estimated 20,000 to 30,000 deaths each year worldwide. ec63691800 Click "Show preview" to get a clickable version of that section. ec63691800 Upendranath Brahmachari synthesised urea stibamine (carbostibamide) in 1922 and determined that it was an effective substitute for the other antimony-containing compounds in the treatment of VL caused by Leishmania donovani. ec63691800 Infections in humans are caused by more than 20 species of Leishmania. Risk factors include poverty, malnutrition, deforestation, and urbanization. All three types can be diagnosed by seeing the parasites under microscopy. Additionally, visceral disease can be diagnosed by blood tests. ec63691800 Many thanks for your support here. Brianboulton (talk) 11:50, 26 March 2016 (UTC)reply ec63691800 Leishmaniasis can be partly prevented by sleeping under nets treated with insecticide. Other measures include spraying insecticides to kill sandflies and treating people with the disease early to prevent further spread. The treatment needed is... ec63691800 Middle-click on the leftmost link on each to open the article where the spelling error is. Search for the misspelled word or words (after the "wikt:"). ec63691800 Image review: None of the images have alt text, so you should fix that. I have my doubts about File:A half-demolished Nelsons Pillar on OConnell Street, Dublin.jpg which has a PD claim added by an editor not provided or verified by the NLI. Despite being an iconic historical image I think it is actually still in copyright because the NLI's catalogue lists the author as

Michael S. Walker. A search of their holding shows he was still active in 1988 and maybe even later, so its copyright status is actually unclear. I've asked the editor who added the PD claim what he based that on. The "no known copyright restrictions" tag states that one should add additional copyright tags to this image if more specific information about copyright status can be determined which puts the onus on us and not on the institution. Nice job on the article which I will read and comment on later. ww2censor (talk) 10:30, 24 March 2016 (UTC)reply ec63691800 The parasite migrates to the internal organs such as the liver, spleen (hence "visceral"), and bone marrow, and, if left untreated, will almost always result in the death of the host. Signs and symptoms include fever, weight loss, fatigue, anemia, and substantial swelling of the liver and spleen. Of particular concern, according to the World Health Organization (WHO), is the emerging problem of HIV/VL co-infection. ec63691800 If you're not sure about a word, you can either leave it for someone else to think about, or put one of these tags after the problem word in the article where it appears: {{typo help inline}} or {{which lang}}. ec63691800 Nelson's Pillar[edit] ec63691800
