== Background == 84c1f65d2e The Acher initially flows northwards, descending sharply. It turns westwards at its confluence with the Seebach, which joins from the north from the Mummelsee below the Hornisgrinde. The Acher then flows through the trough-like valley of Seebach, where the valley reaches a depth of about 550 metres between the Hornisgrinde and the Vogelskopf. In this section, the Acher is also called the Seebach, hinting at the fact that this tributary stream from the Mummelsee was originally considered to be the main headstream of the Acher... 84c1f65d2e
